

XXX-th International Workshop on High Energy Physics “Particle and Astroparticle Physics, Gravitation and Cosmology: Predictions, Observations and New Projects”

Tuesday, 24 June 2014

Hadron spectroscopy and Heavy quarks - Conference Hall (16:05 - 19:10)

time	[id] title	presenter
16:05	[83] Recent BaBar highlights on B-meson physics	KOLOMENSKY, Yury
16:30	[74] Heavy tetraquark states and quarkonium hybrids	Dr CHEN, Wei
16:55	[78] The BESIII experiment	NEFEDOV, Iouri
17:20	Coffee break	
17:40	[31] New results of nucleon resonances studies in photo and electroproduction of charged pion pairs in CLAS detector	ISUPOV, Evgeny
18:05	[71] Baryon spectroscopy from analysis of meson photoproduction data	SARANTSEV, Andrey
18:30	[32] Panel discussion on HQ and Hadron spectroscopy
