

Software Session Introduction

- **Agenda:**
 - ◆ Introduction
 - ◆ Accelerator Physics Tools (Chris)
 - ◆ GRID Status (Malcolm)
 - ◆ Break
 - ◆ Database (David)
 - ◆ Database Discussion (Everyone)
 - ◆ Preparation for the Review (Malcolm)
 - ◆ Discussion (joint with beamline group)

G4MICE Status

- Main issues at the moment are unpacking real data and online database.
- I have more recent code and sample output files from JSG for the DATE DAQ system, but have yet to do any serious work with them.
- Last week wrote code to unpack the new format of the tracker data.

C++ / G4MICE Course

- I will be running two courses which will combine a basic intro to C++ with use of G4MICE.
- The first course will be run at Fermilab in March immediately before the NFMCC meeting.
- The second will be held in the UK (most likely at RAL) at a date to be determined.
