Pakiti

Client-Sever system

- Clients collects and upload information
  - Submitted as jobs to every site
  - Collect installed packets
  - Check running kernel
  - Sends everything to server (with hostname)
- Server stores CVE, sites and states
  - Check packet versions against CVE:
    - Learns RHSA automatically from RedHat
    - Manual additions (EGI-SVG)
  - Check packet versions against repositories:
    Explore software repositories to learn last versions
  - Generates alerts and reports

[Irtf] Pakiti Daily Reminder (10.02.2014) - EGI-Critical

[redacted]@mailman.egi.eu on behalf of [redacted]@mailman.egi.eu

To: [redacted]@mailman.egi.eu

10 February 2014 06:00

Dear Security Officer On Duty,

Please check the following links:

NGI_IT [redacted] (last check: 09.02. 12:45)
https://pakiti.egi.eu/tags_sites.php?tag=EGI-Critical&site=[redacted]
NGI_TR [redacted] (last check: 09.02. 10:07)
https://pakiti.egi.eu/tags_sites.php?tag=EGI-Critical&site=[redacted]
ROC_Canada [redacted] (last check: 10.02. 05:28)
https://pakiti.egi.eu/tags_sites.php?tag=EGI-Critical&site=[redacted]

And re-open tickets/send reminders in RT accordingly. Additional Information on the procedure can be found on:

https://wiki.egi.eu/csirt/index.php/Handling_critical_vulnerabilities

Cheers,

your friendly Pakiti reminder.
