

# **IXth “Trento” Workshop on Advanced Silicon Radiation Detectors <br>(3D and p-type Technologies)**

Wednesday 26 February 2014 - Friday 28 February 2014

Genova - Italy

## **Book of Abstracts**

# Contents

Welcome Address . . . . .	1
Pixel Detectors - on the brink to a new era . . . . .	1
ATLAS Insertable B-Layer (IBL) . . . . .	1
ALICE Monolithic Pixels . . . . .	1
Performance and upgrade of the LHCb Vertex Detector . . . . .	1
Operational experience and radiation damage at LHC . . . . .	1
Status overview & Recent Achievements of the ATLAS Upgrade Planar Pixel Sensors R&D Project . . . . .	1
Doping profiles and TCAD simulations of ATLAS planar pixel sensors for IBL upgrade . . . . .	1
Future sensor production and sensor-chip packaging technologies at CiS . . . . .	2
Planar p-type pixel and strip sensors development for HL-LHC in Japan . . . . .	2
Results from beamtests of the new designs of pixel structures . . . . .	2
Test beam characterization of Ultra-Thin hybrid pixel Timepix assemblies for CLIC Vertex R&D . . . . .	2
Measurement of the Drift Velocity of Electrons and Holes in High-Ohmic <100> Silicon for Electric Fields between 5 and 50 kV/cm for Temperatures between -40°C and +60°C . . . . .	2
Microstrip stacked detectors . . . . .	3
Highlights from IBL 3D Module Production . . . . .	3
Experience with CNM 3D sensors for the ATLAS IBL . . . . .	3
Discarding low performance 3D sensors before bump bonding . . . . .	3
3D silicon pixel detectors for the ATLAS Forward Physics experiment . . . . .	3
Characterization of double-sided 3D sensors after proton and neutron irradiation . . . . .	3
Characterization and performance of 3D silicon pixel detectors for CMS . . . . .	3
Characterization of CNM's 3D pixel sensors for the phase-2 upgrade of the CMS vertex detector . . . . .	4

Test-beam study of the performance of Sintef CMS-2E 3D pixel detectors . . . . .	4
Performance Of Thin Edgeless N-on-p Planar Pixel Sensors for ATLAS Upgrades . . . . .	4
Development of thin n-in-p pixel modules for the ATLAS upgrade at HL-LHC . . . . .	4
Thin Edgeless Pixel Sensors on Epitaxial Wafers After Irradiation . . . . .	4
Investigation of LGAD for Ultra-Fast Silicon Detectors . . . . .	4
First measurements of new p-type strip and pad detectors with LGAD in epitaxial wafers	5
Simulation of reduced edge planar pixel sensor for the High Luminosity LHC . . . . .	5
A study of charge multiplication in silicon strip detectors . . . . .	5
Simulation of Ultra-Fast Silicon Detectors . . . . .	5
Latest measurements of LGAD diodes fabricated at IMB-CNM . . . . .	5
Radiation hardness of Low Gain Amplification Diodes (LGAD) . . . . .	5
Timing properties of Ultra-Fast Silicon Detector . . . . .	6
Compact and Low-Power Time to Digital Converters for High Granularity Silicon Detectors . . . . .	6
HV-CMOS Overview . . . . .	6
Radiation-hard Active Pixel Sensors for HL-LHC Detector Upgrades based on HV-CMOS Technology . . . . .	6
Particle Tracking with 3D Monolithically Stacked CMOS Active Pixel Sensors . . . . .	6
Development of thin pixel modules using novel 3D Processing techniques . . . . .	6
Developments of silicon based low temperature detectors (LTD) at Genoa. . . . .	6
Conclusions and Thanks . . . . .	7

**Introduction: pixel & tracking systems / 30**

## **Welcome Address**

**Introduction: pixel & tracking systems / 31**

## **Pixel Detectors - on the brink to a new era**

**Corresponding Author:** wermes@uni-bonn.de

**Introduction: pixel & tracking systems / 32**

## **ATLAS Insertable B-Layer (IBL)**

**Corresponding Author:** didier.ferrere@cern.ch

**Introduction: pixel & tracking systems / 33**

## **ALICE Monolithic Pixels**

**Corresponding Author:** petra.riedler@cern.ch

34

## **Performance and upgrade of the LHCb Vertex Detector**

**Introduction: pixel & tracking systems / 35**

## **Operational experience and radiation damage at LHC**

**Corresponding Author:** konstantin.toms@cern.ch

**Planar Sensors / 36**

## **Status overview & Recent Achievements of the ATLAS Upgrade Planar Pixel Sensors R&D Project**

**Corresponding Author:** julia.rieger@cern.ch

37

## **Doping profiles and TCAD simulations of ATLAS planar pixel sensors for IBL upgrade**

Corresponding Author: [dinu@lal.in2p3.fr](mailto:dinu@lal.in2p3.fr)

Planar Sensors / 38

## **Future sensor production and sensor-chip packaging technologies at CiS**

Corresponding Author: [tobias.wittig@cern.ch](mailto:tobias.wittig@cern.ch)

Planar Sensors / 39

## **Planar p-type pixel and strip sensors development for HL-LHC in Japan**

Corresponding Author: [yoshinobu.unno@kek.jp](mailto:yoshinobu.unno@kek.jp)

Planar Sensors / 40

## **Results from beamtests of the new designs of pixel structures**

Corresponding Author: [daiki.yamaguchi@cern.ch](mailto:daiki.yamaguchi@cern.ch)

Planar Sensors / 41

## **Test beam characterization of Ultra-Thin hybrid pixel Timepix assemblies for CLIC Vertex R&D**

Corresponding Author: [mathieu.benoit@cern.ch](mailto:mathieu.benoit@cern.ch)

42

## **Measurement of the Drift Velocity of Electrons and Holes in High-Ohmic <100> Silicon for Electric Fields between 5 and 50 kV/cm for Temperatures between -40°C and +60°C**

Corresponding Author: [robert.klanner@cern.ch](mailto:robert.klanner@cern.ch)

**Planar Sensors / 43**

## **Microstrip stacked detectors**

**Corresponding Author:** giulio.pellegrini@cnm.es

**3D Sensors / 44**

## **Highlights from IBL 3D Module Production**

**Corresponding Author:** andrea.gaudiello@cern.ch

**3D Sensors / 45**

## **Experience with CNM 3D sensors for the ATLAS IBL**

**Corresponding Author:** ivan.lopez.paz@cern.ch

**3D Sensors / 46**

## **Discarding low performance 3D sensors before bump bonding**

**Corresponding Author:** sonia.fernandez@cern.ch

**3D Sensors / 47**

## **3D silicon pixel detectors for the ATLAS Forward Physics experiment**

**Corresponding Author:** joern.lange@cern.ch

**3D Sensors / 48**

## **Characterization of double-sided 3D sensors after proton and neutron irradiation**

**Corresponding Author:** roberto.medicino@unitn.it

**3D Sensors / 49**

## **Characterization and performance of 3D silicon pixel detectors for CMS**

**Corresponding Author:** fabio.ravera@cern.ch

3D Sensors / 50

## **Characterization of CNM’s 3D pixel sensors for the phase-2 upgrade of the CMS vertex detector**

**Corresponding Author:** francisca.javiela.munoz.sanchez@cern.ch

3D Sensors / 51

## **Test-beam study of the performance of Sintef CMS-2E 3D pixel detectors**

**Corresponding Author:** l.vigani@campus.unimib.it

Active edge / Charge multiplication / 52

## **Performance Of Thin Edgeless N-on-p Planar Pixel Sensors for ATLAS Upgrades**

**Corresponding Author:** boscardi@fbk.eu

Planar Sensors / 53

## **Development of thin n-in-p pixel modules for the ATLAS upgrade at HL-LHC**

**Corresponding Author:** anna.macchiolo@cern.ch

Active edge / Charge multiplication / 54

## **Thin Edgeless Pixel Sensors on Epitaxial Wafers After Irradiation**

**Corresponding Author:** ggiacomini@fbk.eu

Active edge / Charge multiplication / 55

## **Investigation of LGAD for Ultra-Fast Silicon Detectors**

**Corresponding Author:** hartmut@scipp.ucsc.edu

*Active edge / Charge multiplication / 56*

## **First measurements of new p-type strip and pad detectors with LGAD in epitaxial wafers**

**Corresponding Author:** marta.baselga@cern.ch

*Active edge / Charge multiplication / 57*

## **Simulation of reduced edge planar pixel sensor for the High Luminosity LHC**

**Corresponding Author:** vagelis.gkougkousis@cern.ch

*Active edge / Charge multiplication / 58*

## **A study of charge multiplication in silicon strip detectors**

**Corresponding Author:** riccardo.mori@cern.ch

*Active edge / Charge multiplication / 59*

## **Simulation of Ultra-Fast Silicon Detectors**

**Corresponding Author:** francesca.cenna@cern.ch

*Active edge / Charge multiplication / 60*

## **Latest measurements of LGAD diodes fabricated at IMB-CNM**

**Corresponding Author:** virginia.greco@pi.infn.it

*Active edge / Charge multiplication / 61*

## **Radiation hardness of Low Gain Amplification Diodes (LGAD)**

**Corresponding Author:** gregor.kramberger@ijs.si

**Active edge / Charge multiplication / 62**

## **Timing properties of Ultra-Fast Silicon Detector**

**Corresponding Author:** cartiglia@to.infn.it

**CMOS Sensor and Other Topics / 63**

## **Compact and Low-Power Time to Digital Converters for High Granularity Silicon Detectors**

**Corresponding Author:** rivetti@to.infn.it

**CMOS Sensor and Other Topics / 64**

## **HV-CMOS Overview**

**Corresponding Author:** ivan.peric@ti.uni-mannheim.de

**CMOS Sensor and Other Topics / 65**

## **Radiation-hard Active Pixel Sensors for HL-LHC Detector Upgrades based on HV-CMOS Technology**

**Corresponding Author:** malte.backhaus@cern.ch

**CMOS Sensor and Other Topics / 66**

## **Particle Tracking with 3D Monolithically Stacked CMOS Active Pixel Sensors**

**Corresponding Author:** daniele.passeri@diei.unipg.it

**CMOS Sensor and Other Topics / 67**

## **Development of thin pixel modules using novel 3D Processing techniques**

**Corresponding Author:** thomas.mcmullen@cern.ch

**CMOS Sensor and Other Topics / 68**

## **Developments of silicon based low temperature detectors (LTD) at Genoa.**

**Corresponding Author:** [michele.biasotti@ge.infn.it](mailto:michele.biasotti@ge.infn.it)

CMOS Sensor and Other Topics / 69

### **Conclusions and Thanks**
