Cybersecurity Update

Friday, 9 May 2008 11:45 (30 minutes)

An update on recent security issues and vulnerabilities affecting Windows, Linux and Mac platforms. This talk is based on contributions and input from a range of colleagues both within and outside CERN. It covers clients, servers and control systems.

Primary author: HEAGERTY, Denise (CERN)

Presenter: CONS, Lionel (CERN)

Session Classification: Networking infrastructure and computer security

Track Classification: Networking infrastructure and computer security
