New Data Center at BNL – Status Update

Tuesday 6 May 2008 16:30 (20 minutes)

This presentation provides an update on the status of the new Data Center to support the ATLAS Tier 1 Center and RHIC Computing at Brookhaven. A brief discussion provides details of the new facility to Brookhaven, as well as timelines for availability to both the ATLAS and RHIC programs. Some of our experiences described in this presentation will also be beneficial to other sites who are considering expansion of their own facilities.
