

HEPiX Spring 2008

Monday 5 May 2008 - Friday 9 May 2008

CERN

Scientific Programme

These are general topics of interest for the HEPiX Spring 2008 conference technical sessions. Whether these tracks have dedicated sessions in the final agenda will depend on the number of submissions that are received and accepted in each track. We look forward to seeing your contribution!

LHC and Data Readiness

Welcome

LHC overview

Trigger farms of LHC experiments

LCG overview and status

CCRC

Site Reports

Presentations from each participating HEP site describing the latest developments at their respective sites.

Storage technology

CPU technology

Data centre management, availability, and reliability

Problem resolution, problem tracking, alarm systems

System management

Networking infrastructure and computer security

Applications and Operating systems

HEPiX "bazaar and thinktank"

General

Virtualisation

Grid stuff (Monitoring etc.)

Miscellaneous
