

HEPiX Spring 2008

Monday 05 May 2008 - Friday 09 May 2008

CERN

Scientific Programme

These are general topics of interest for the HEPiX Spring 2008 conference technical sessions. Whether these tracks have dedicated sessions in the final agenda will depend on the number of submissions that are received and accepted in each track. We look forward to seeing your contribution!

LHC and Data Readiness

Welcome
LHC overview
Trigger farms of LHC experiments
LCG overview and status
CCRC

Site Reports

Presentations from each participating HEP site describing the latest developments at their respective sites.

Storage technology

CPU technology

Data centre management, availability, and reliability

Problem resolution, problem tracking, alarm systems
System management

Networking infrastructure and computer security

Applications and Operating systems

HEPiX "bazaar and thinktank"

General
Virtualisation
Grid stuff (Monitoring etc.)
Miscellaneous
