

## Motivation for CLIC/ILC collaboration

- Lack of resources: (both CLIC and ILC)
  - Join resources where useful and avoid duplication
- Foster ideas and favor exchanges
  - Beneficial to both
- Aiming (as much as possible) on common system designs
  - similar energy; Ex: BDS, MDI, Detector, Cost....
  - Identify necessary differences due to technology and/or energy
- Avoid negative image of conflicting teams
  - Devastating for HEP
- Minimize contradicting presentations in 2010 (?):
  - Status, advantages, issues and prospects of both technologies for the best use of future HEP
- Even if ILC technology more mature, timescale not so ≠ :
  - Technical Design in 2010-2012 for ILC and 2014 for CLIC

CLIC/ILC Collaboration: 08/ 02/ 08

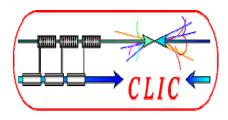

J.P.Delahaye for the CLIC study team

## Limitations

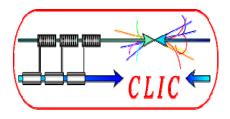

- CERN resources dedicated to ILC very limited:
  - Man-Power: 1.2 FTE; Budget: 40 kCHF
- Available resources allocated to CLIC study by CLIC/CTF3 collaboration
  - 24 Institutes from 13 Countries
- Possible use of CLIC resources on ILC study at the strict condition that final result is beneficial to CLIC study
  - And vice-versa

# Method?

- Presently (for each sub-system):
  - ILC team working on ILC system with ILC beam at 500 GeV
  - CLIC team working on CLIC system with CLIC beam at 3 TEV and scaling down to 1 TeV and 500 GeV
  - Fruitful exchanges between technical experts
  - Different designs of sub-systems for (not always) good reasons
- Possible future
  - CLIC & ILC teams working together on CLIC and ILC systems at 500 GeV
  - Identify together if same design/technology can be used or not
    - understand why and what necessary differences
  - Define together necessary modifications of the sub-system for the upgrade in energy to 1 TeV for ILC and 3 TeV for CLIC

## Conclusion

- CLIC/ILC collaboration on subjects with strong synergy = Win – Win for both studies and for HEP
- Ambitious but Realistic and Practical
  - start on limited number of subjects
  - well defined plan of (limited) actions
  - with good chance of success

#### Collaborative / Competition and / or Competitive / Collaboration
