Jean-Michel Chaize + Andy Gotz

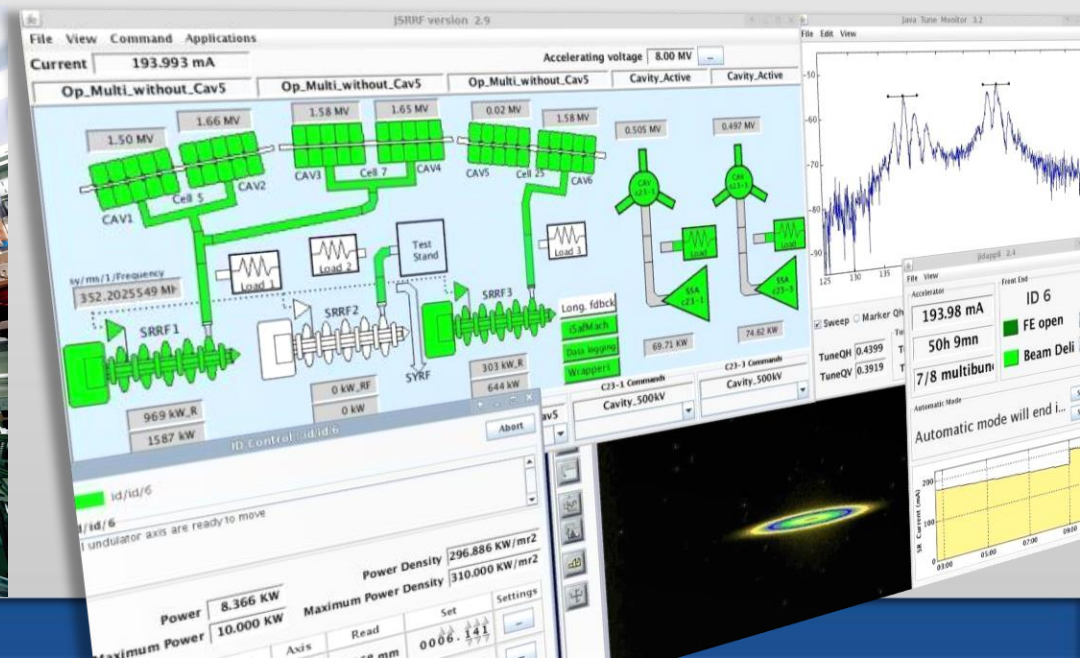

ESRF Grenoble France

HEPTech NCSR DEMOKRITOS 2nd 3rd December 2013

A European Control System framework

«Remote control anything and everything»

- A mature Open Source product
- > 100 man years of development
- Used in 15+ big instruments
- Active community
- Object oriented, topology independent, highly scalable,
- Operating system independent
- Multi language

is HIGHLY scalable !

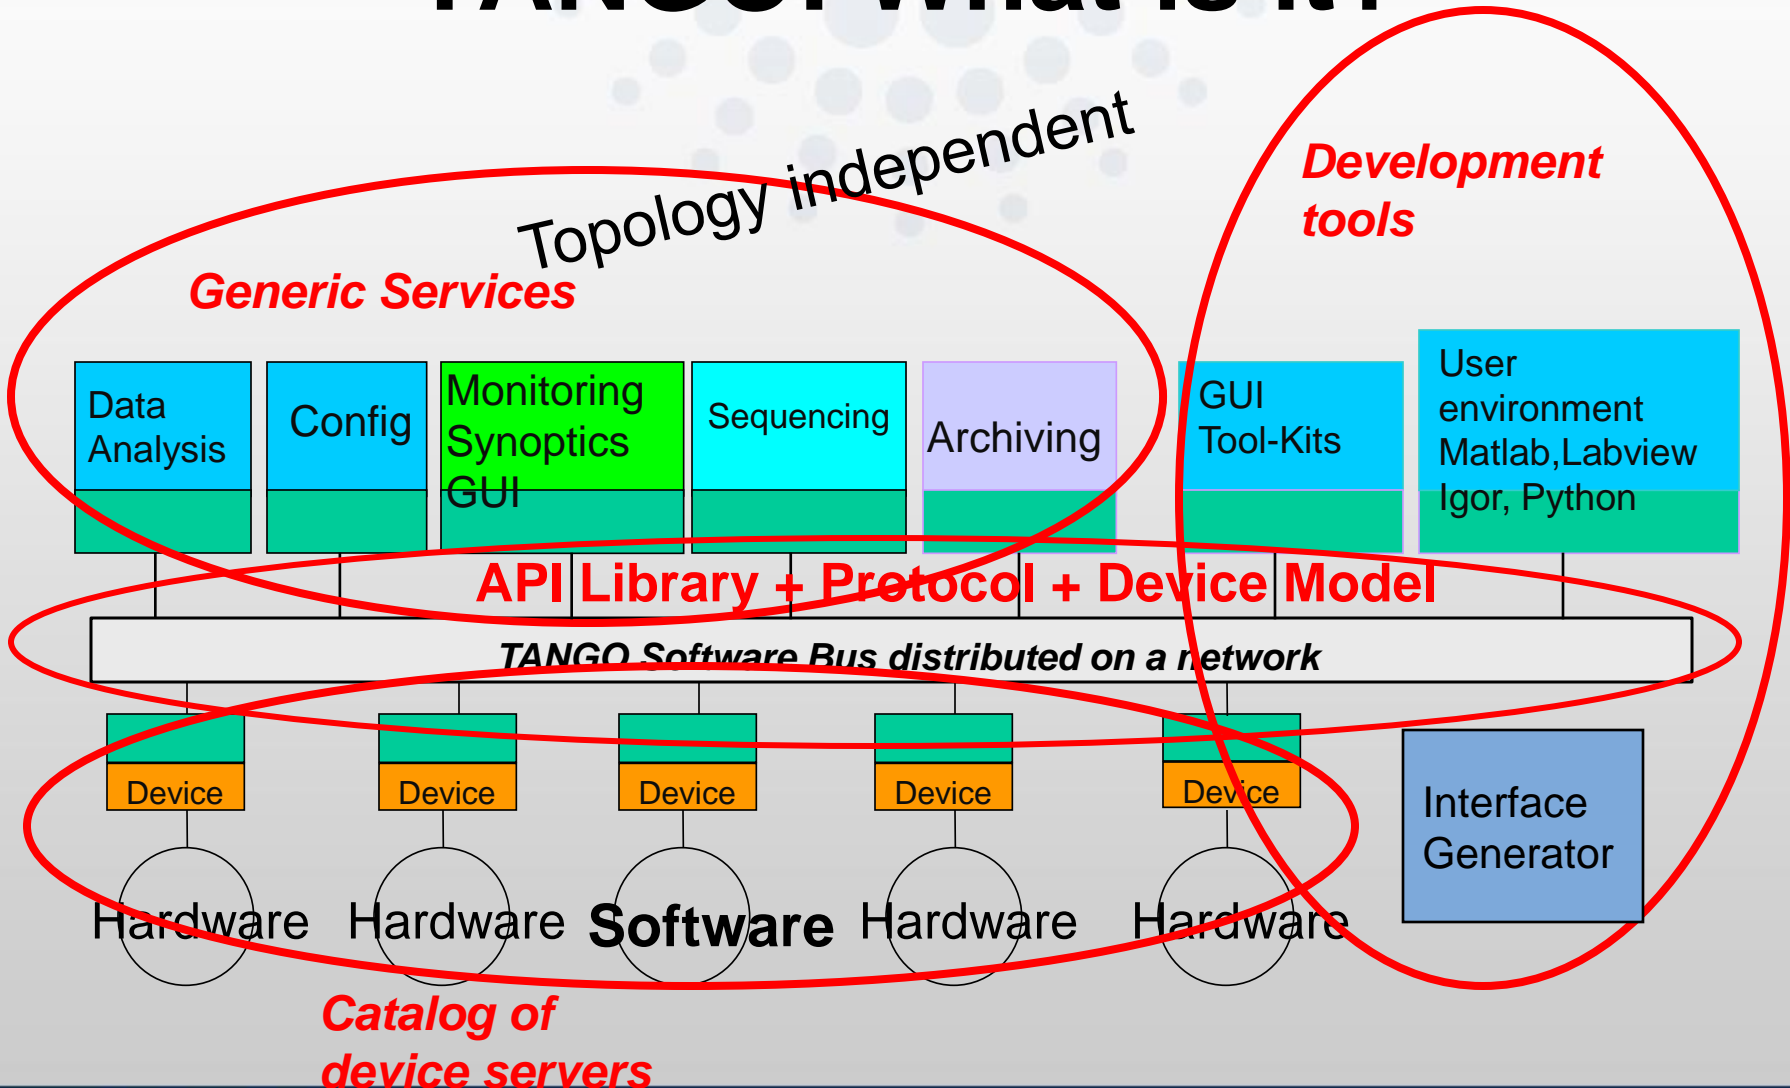

From small embedded platforms

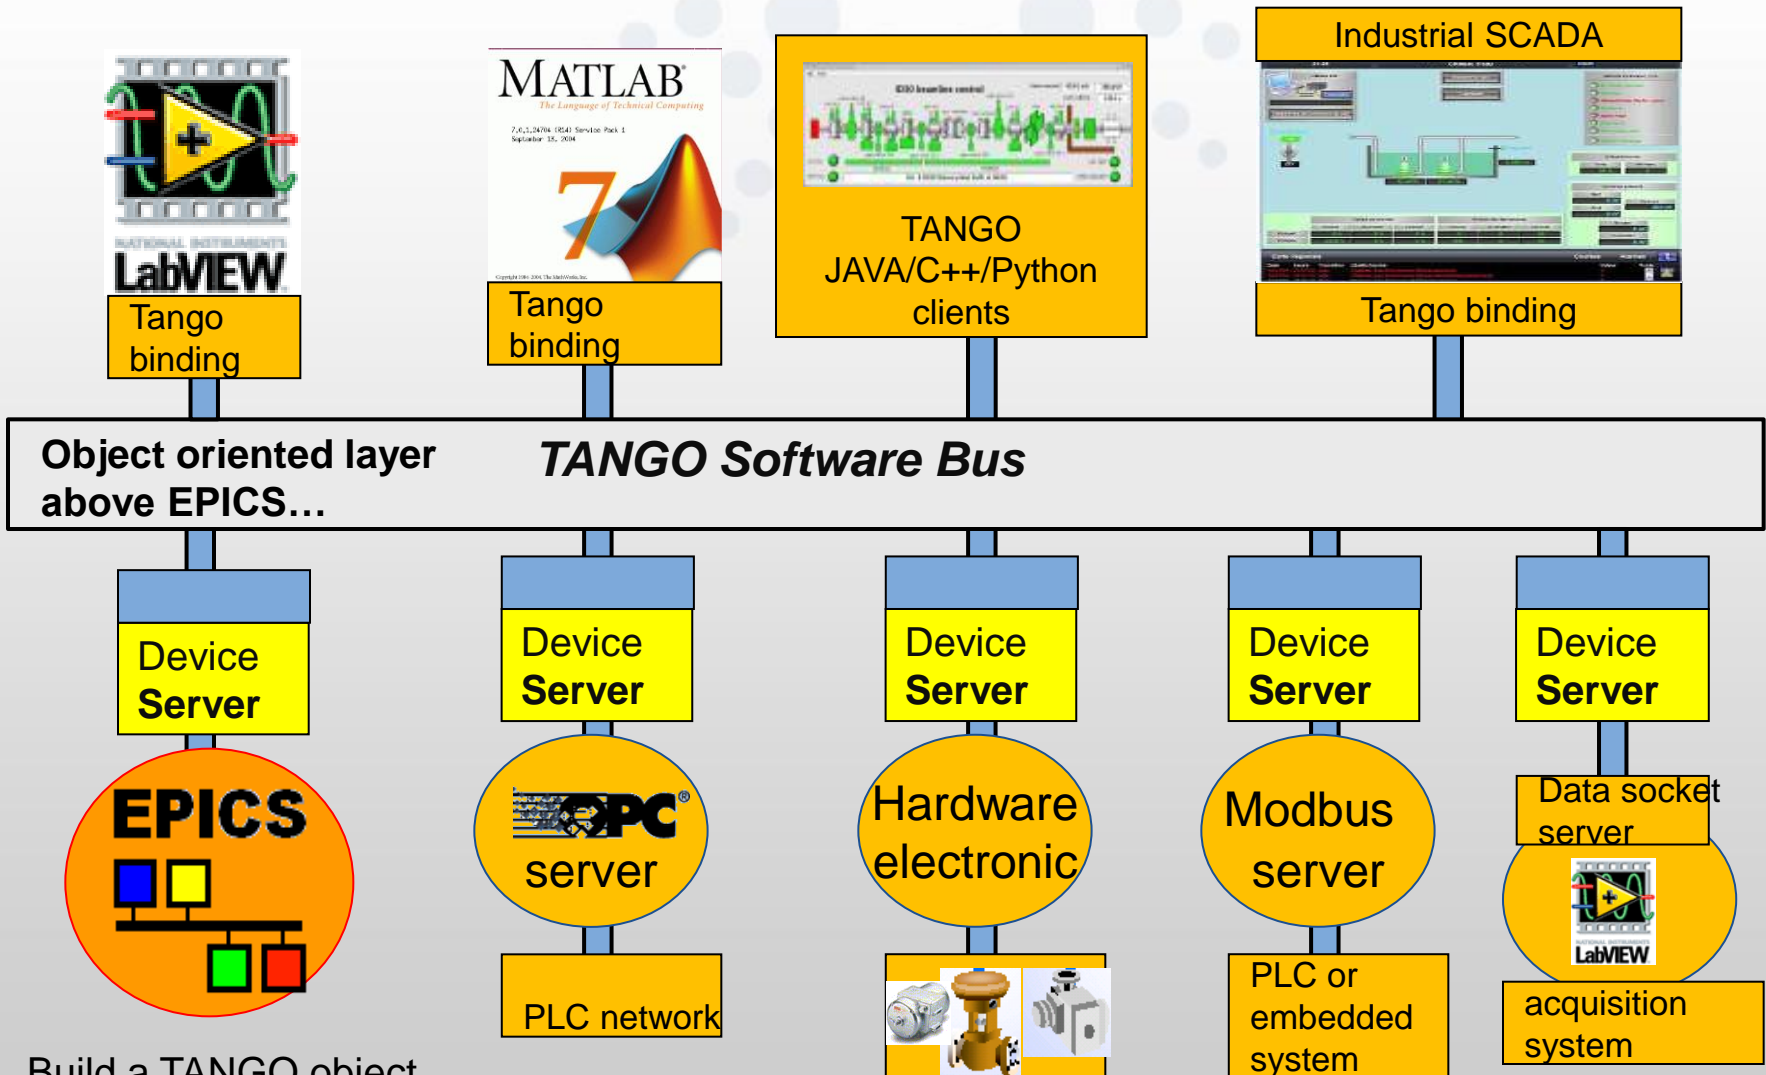

... to big scientific instruments
 > 1 000 000 signals and actuators

TANGO: What is it?

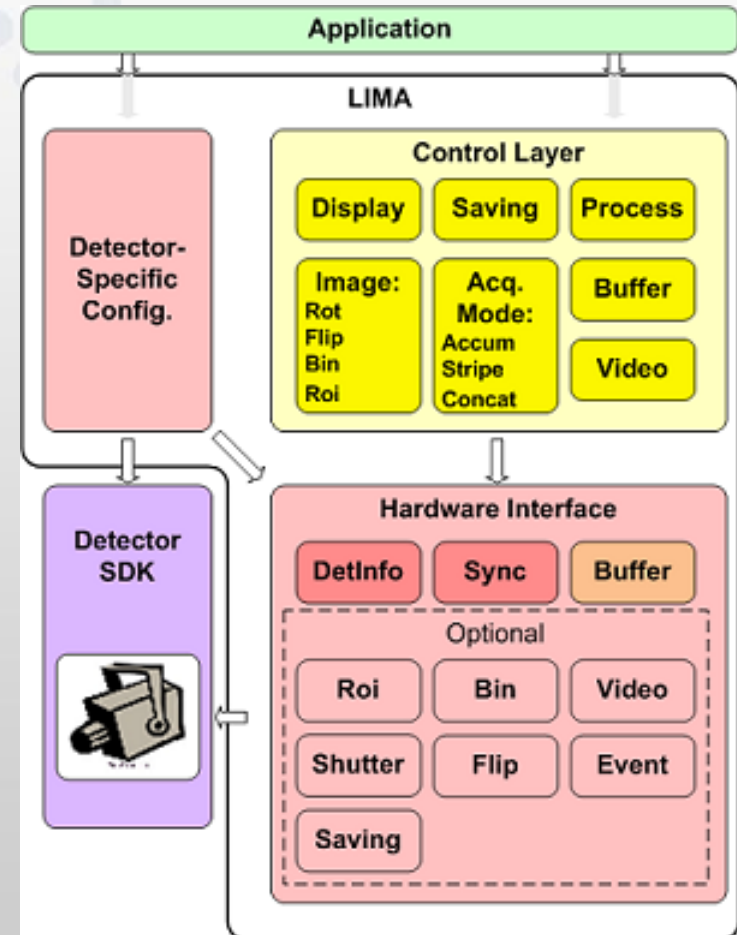

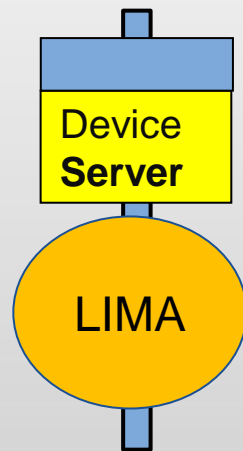

TANGO as a bridge

Build a TANGO object from a set of channels

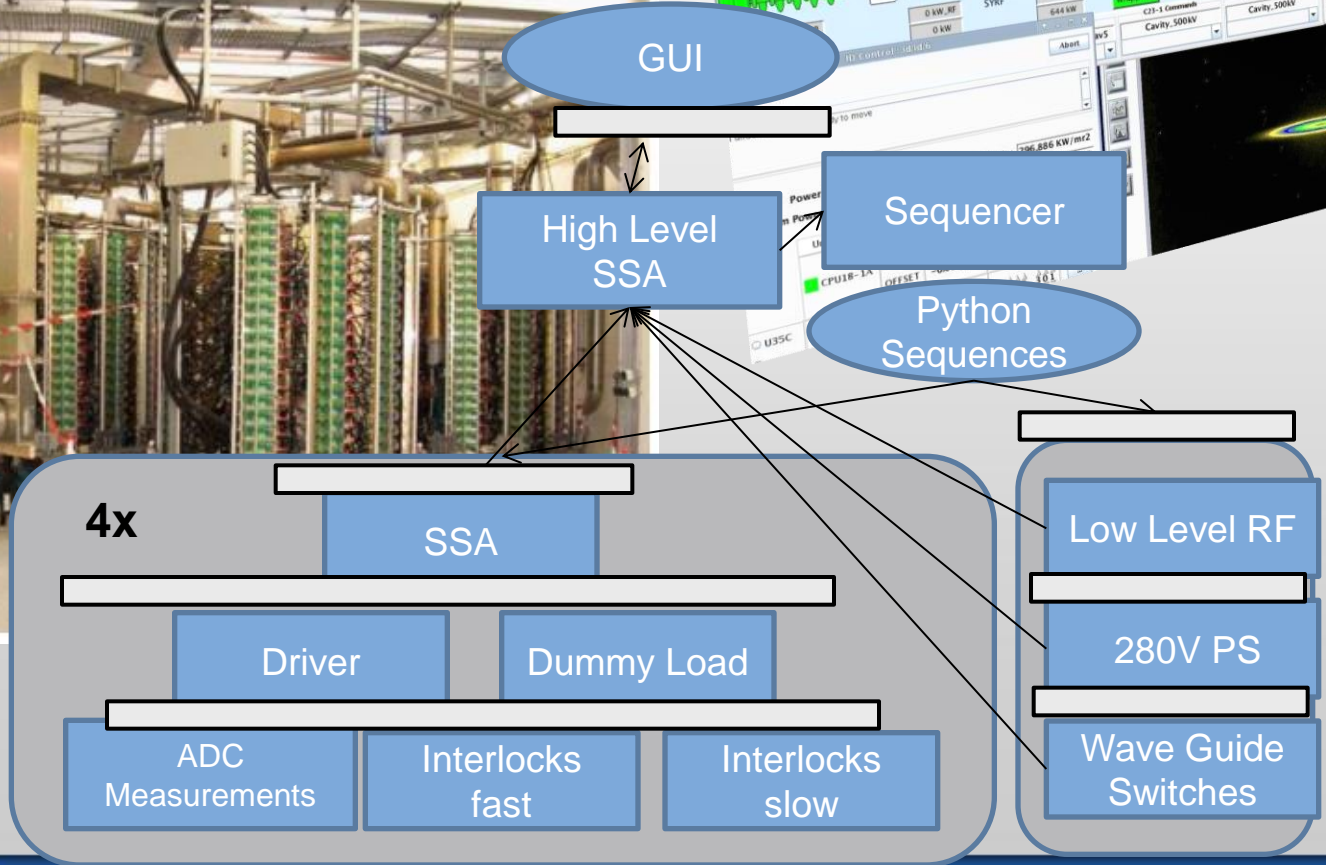

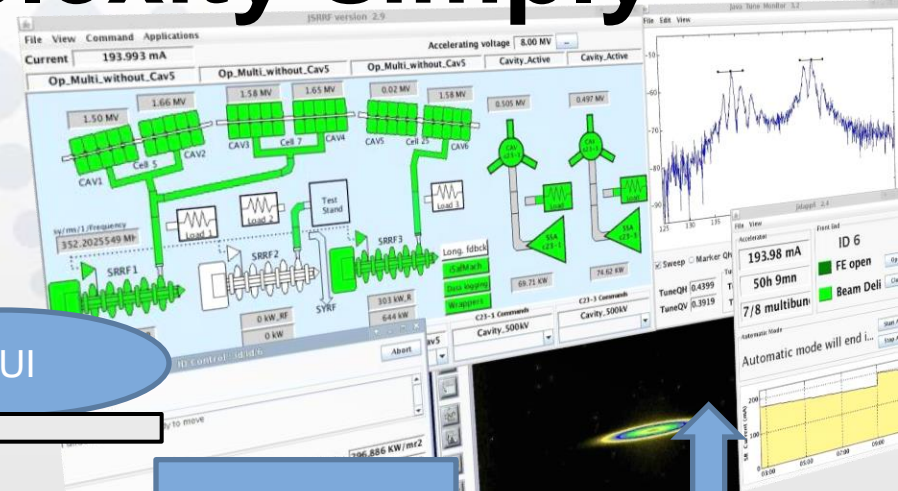

Detectors + TANGO = LIMA

- TANGO uses the LIMA framework to interface all kinds of 2D detectors
- Process integrates online data analysis
- >20 detectors in use at >10 sites

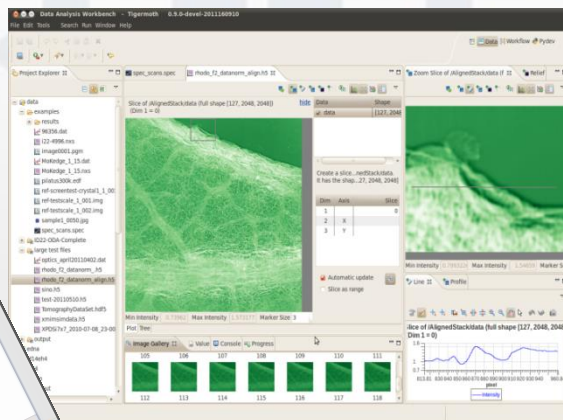

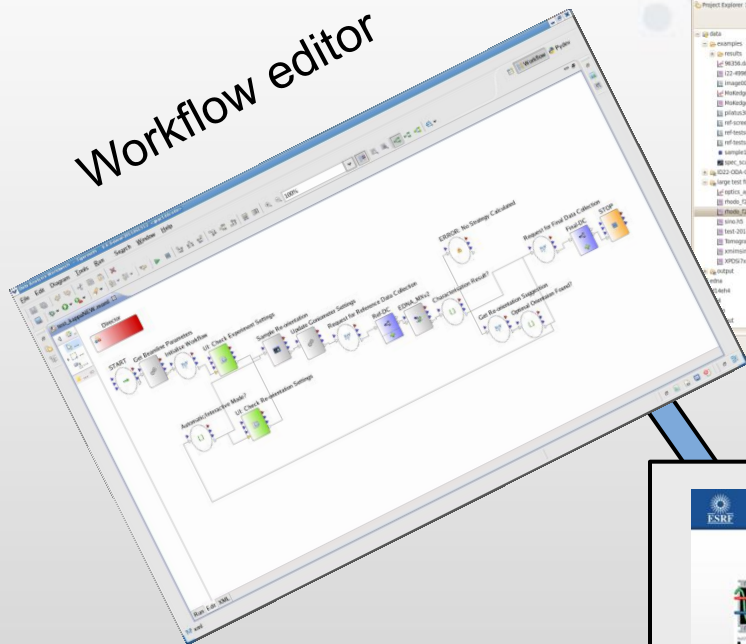

Managing complexity simply

- Hierarchical structures ideal for managing complex systems

A step further with workflow tools

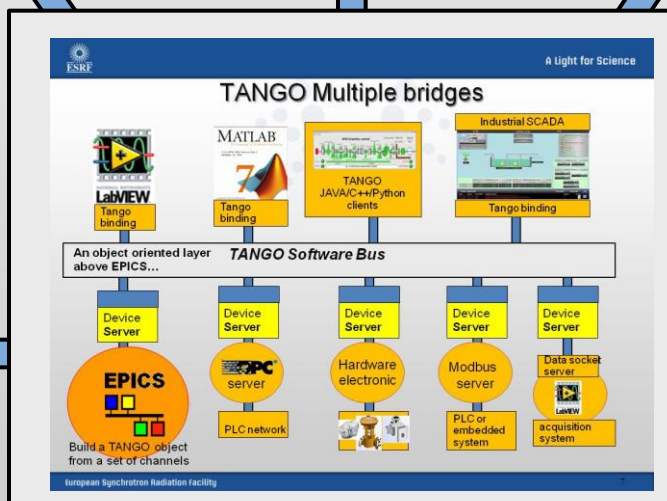

Workflow editor

Sequencing tool

Your plugin

Much more than a software bus

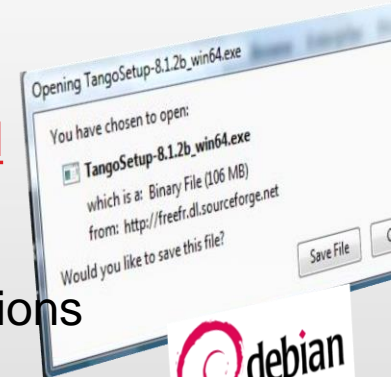

- Code generator for C++, Java, python
- Configuration tool
- Administration tool
- Archiving service
- Access control service
- Logging service
- Scan service
- GUI Toolkit for Java,QT, Python
- Synopsis animation tool
- Alarm service
- Web interface
- Android support
- Tutorials

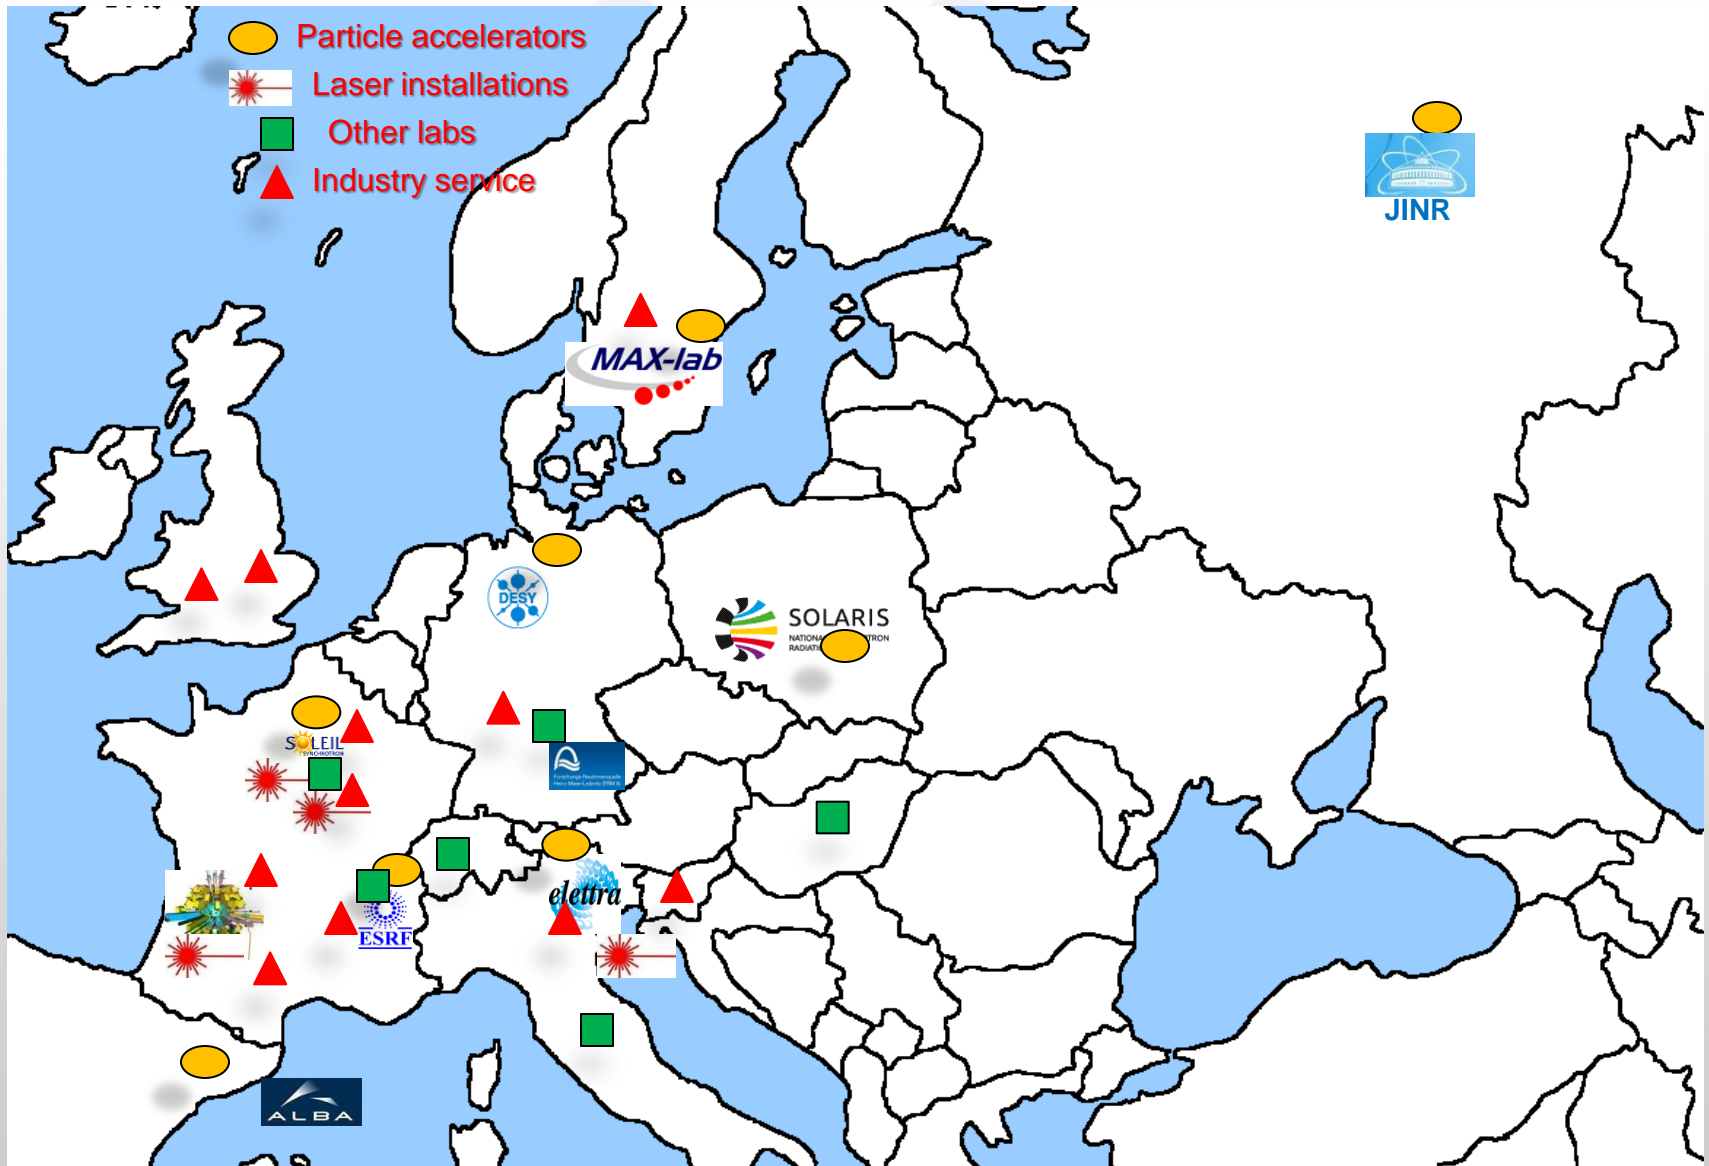

- Bindings
- Many utility classes
- Hardware access class catalog
- Mailing list support

How to try it?

- TANGO is available free of charge
- Source code distribution
- Downloadable on <http://www.tango-controls.org/download>
- Binary Packages
 - Available for Ubuntu + Debian Linux in the standard distributions
`sudo apt-get install tango-common tango-db python-pytango`
 - Available for Windows on <http://www.tango-controls.org/download>
- The Tango Box
 - An Ubuntu virtual machine with Tango installed and configured for easy testing
 - Runs on VMware and Virtualbox

Use cases

- TANGO was born in particle accelerator world, however ...
- TANGO is a generic solution for any collection of objects
- Used also in other scientific domains like
- Wind tunnels e.g. ONERA
- Neutron source experiments
- Large laser installation
 - LMJ, PETAL, APOLLON
 - Free Electron Laser (Fermi)
- Small instruments
 - Thomx (art and medicine)
- Small installations
 - Embedded systems
 - Industrial supervision

TANGO Industrialization

Promoting the use of TANGO in and by Industry

*Speeding up
technology transfers*

- **Funding**
- *Foster the eco-system,*
- *Help industry to adopt TANGO*
- *Make it a de facto standard*

Stimulate the snowball effect

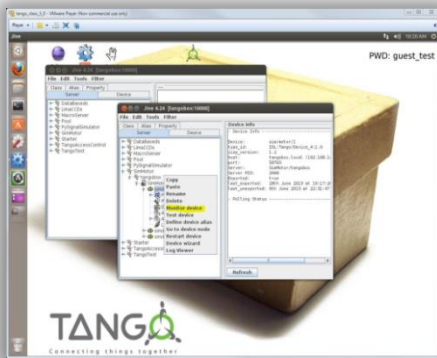

Enhance the eco-system

- Welcome new users and industrial partners
- Increase the number of trained people
- Ease the first steps with TANGO
- Help system integrators to access new markets
- Getting more TANGO enabled hardware
- Provide industrial standard quality + support
- Make it a de-facto standard
- ...

First steps toward industry

- Industry can play a central role in providing support and training on TANGO.
- They have already helped to improve the tutorials, the documentation and the marketing:

- Some companies offer professional training sessions
- We are building a catalogue of referenced competent companies

In progress...

- Redesign of web site with professional communicators
 - <http://www.tango-controls.org>
- Education program
 - University partnership
- Improve the communication :
 - Better sharing of device servers
 - Better sharing of technical solutions
 - FAQ, Forum ...

TANGO – versus industrial SCADA or proprietary DCS

Open Source

- Be master of your future.
- You own your code.

An active community at your service

- Science, industry, services, students...

Free to try and distribute, adopt or give-up

The hardware of your choice

Multi-language and multi-platform

Scalable from 1 device to 1000000 devices

Can integrate SCADA(s) accesses

The same protocol at each layer

- Hardware access
- Data analysis
- High level

You need to :

- unpack yourself
- adapt it to your needs
- Hardware is not provided
- You have no formal guarantee

Industrial partners can help you by

- Unpacking
- Customizing
- Provide hardware
- Guaranteeing the solution

TANGO – Generating economical activity

- System integrator added value
 - Development of device server
 - Service and consulting
 - Customization
 - Solution provider including hardware
 - Hotline and guaranty

- Potential markets for system integrators
 - Research Institutes
 - Internal projects use
 - SCADA and DCS market
 - Laboratory automation
 - Automation Test stands
 - Internet of Things

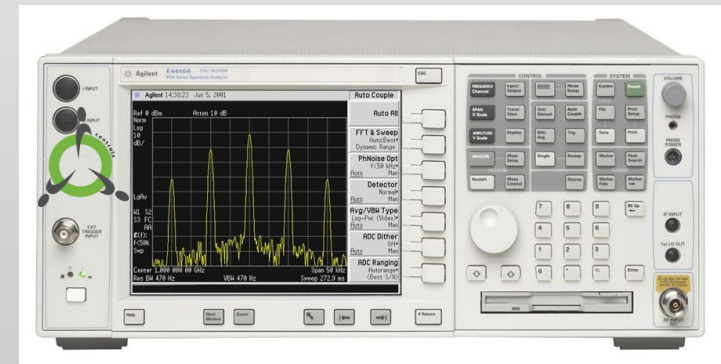

TANGO – Generating economical activity Instrumentation hardware market

- Tango compatible hardware
 - Supplier provides and guaranty The TANGO interface to their product

- Advantage for the supplier :
 - Sales argument for addressing TANGO community
 - Provide remote control of device
 - Profit for free from TANGO framework

- Advantage for the community/client/user
 - Easier integration
 - Better matching of the hardware features

Recent projects started with TANGO

東北大学
TOHOKU UNIVERSITY

The Italian *Mars* Society

... more and more industrial partners ...

The Business of Science®

Softwareschneiderei

Snowball effect : projects evaluating TANGO

and others not mentioned here ...

TANGO Software Foundation

- Goal – official entity to manage TANGO
- Legal representative of TANGO community
- Protect interests, logo, licenses etc.
- Define official releases and standards
- Collect and manage funds to promote TANGO
- Examples
 - *Apache Foundation*
 - *Eclipse.org*
 - *Linux.org*

Our goal ... TANGO to be the Android of SCADA and DCS !

TANGO = a control system for the future

- *Are you ready to join the TANGO community?*
- The community is ready for you !
