

# Development and Support of Controls at ESS

*Garry Trahern*

*European Spallation Source*

[garry.trahern@ess.se](mailto:garry.trahern@ess.se)

The European Spallation Source, when completed, will be the brightest source of neutrons for material research in Europe. The Integrated Control System project at ESS is tasked to provide the control systems for the ESS facility including Accelerator, Target, Neutron Instrument devices and Conventional Facilities. This talk discusses the strategy for software and hardware that will be used to deliver controls for ESS.
