ADCOS report
30 Sep. - 7 Oct.

Helmut Wolters,
Alexey Sedov

Central services & CERN

- BNL VOMS server:

  - the BNL VOMS server had to be switched off because of the new CA (/DC=com/DC=DigiCert-Grid/O=Open Science Grid/OU=Services/CN=vo.racf.bnl.gov) which is now providing the host certificate, resulting in a different DN of the VOMS server. This DN is hardcoded in a file for the EGI sites. **Sites should update the file!**

- CERN VOMS server:

  - 3 hosts behind lcg-voms.cern.ch had wrong DNs, as a result many bad proxies, GGUS:97814

- CERN staging problem was seen all the week, GGUS:97662

Tier 0/1

- ## INFN-T1, TRIUMF :

  - Failing transfers (related to BNL VOMS issue)

- ## PIC :

  - Network problem GGUS:97692

- ## RAL:

  - SL6 migration : Change in Cloudconfig was required

  - Some glitches GGUS:97731

- ## BNL:

  - Fts02.usatlas.bnl.gov proxy expired because of bad VOMS server at CERN (see previous page), GGUS:97808

Thanks

- Thanks to all the shifters and helpful experts!
