

16:00 **Thursday 4pm discussion 30'**

*This "Thursday discussion" is reserved for any discussion that may come out of the QT session or earlier sessions.*

**News** before we start:

---

**Andrew** will report in the Simulation Steering meeting on Tuesday with the aim of communicating TRT plans for simulation developments & obtaining understanding of where this can fit in with their simulation production plans.

---

**Fred** created **To: atlas-trt-argon (TRT Operation with Ar Gas Mixture)**

*Welcome to the TRT Argon mailing list. It is my request that all emails involving work on the Ar gas mixture be sent to this list so that the messages are archived and everyone working on the Ar gas mixture is informed. This includes messages on:*

*1) Studies of the p-A argon data. 2) Physics affect studies. 3) Monte Carlo work both simulation and digitization. 4) Garfield Studies. 5) Monte Carlo generation. 6) Other stuff I didn't think of.*

*I propose once a month dedicating the TRT SW meeting to the work on Argon.*

Yes, agreed

and let's do this on the first Thursday every month to coincide with Artem, Diane QT reports.
