Invited Talk: The Fermi Large Area Telescope: science highlights and prospects for the extended mission

Wednesday, June 25, 2014 12:00 PM (30 minutes)

Launched on June 11 2008, the the Fermi Gamma-ray Space Telescope has successfully completed its first sixth years of operation in space. We shall briefly review the status of the observatory, along with some of the most recent science highlights, and discuss the prospects for the extended phase of the mission.

Presenter: BALDINI, Luca (INFN-Pisa)

Session Classification: Plenary Talks
