Invited Talk: Astroparticle physics in the next decade

Thursday 26 June 2014 11:00 (45 minutes)

Astroparticle physics is by now a mature field of physics, bridging astrophysics, cosmology, nuclear and particle physics. This talk will deal with what has been accomplished and what the outstanding questions are. An overview is given, containing some thoughts about how to best obtain the answers to the unsolved questions, given realistic technological advancements and financial resources.

Presenter: BERGSTROM, Lars (Stockholm University)

Session Classification: Plenary Talks
