

10th Int. Workshop on Heavy Quarkonium Physics

Quarkonium 2014 10-14 November 2014, CERN

Dear colleagues,

The "10th International Workshop on Heavy Quarkonium Physics (Quarkonium 2014)" will take place at CERN on November 10-14, 2014, at CERN, where these meetings started twelve years ago. This workshop will be an excellent opportunity to discuss new measurements, recent progress in the theoretical calculations, and how these two perspectives fit together. Meeting at CERN is particularly suitable given the very important role that the LHC experiments are having in shaping this field.

The workshop spans over 5 days and will be organized in sessions addressing the following topics:

- Spectroscopy
- Decays
- Production
- Standard Model
- Beyond the Standard Model
- Quarkonium in Media.

We invite you to register at your earliest convenience, through the workshop webpage: indico.cern.ch/e/quarkonium2014
There is no conference fee.

Note that we have pre-booked some rooms in the CERN hostels.

Conference participants should familiarize themselves with visa requirements well in advance of the conference. Letters of invitation for visa purposes will be sent by CERN, upon request, to registered participants.

For practical details see the workshop webpage.

We are looking forward to a fruitful workshop with interesting discussions and significant progress in our understanding of heavy quarkonia.

Best regards,
the local organizing committee
