

Team Edusafe

# Understand the challenge

- Overcoming the cognitive challenges that some people face due to mental disorders, e.g. autism
  - Challenges in everyday learning
  - Challenges regarding learning to communicate
- The applied method being Applied Behavioral Analysis (ABA)
- To understand the challenge we need to perform Internet research
  - Children & adults affected by behavioral problems are a challenging group to understand. We need to do some background research

# Planning the needfinding

- Meeting experts
  - To get a deeper perspective on the subject
- Meeting parents/caretakers
- Meeting the target group/end-users
- Mapping the stakeholders
