

Session Program

2-7 Jun 2014

**Large Hadron Collider Physics (LHCP)
Conference**

Parallel: BSM 3

Columbia University, New York, USA

Thursday 5 June

10:45

Parallel: BSM 3

Session |

Location: Columbia University, New York, USA, Lerner Hall (1st Floor): Roone Arledge Auditorium (East) |

Conveners: Benjamin Henry Hooberman, Till Eifert, Ms Caterina Doglioni

10:45-11:03

TeV Scale Models of new Physics at the LHC

Speaker

Prof. Satya Nandi

11:03-11:21

Searches for electroweak production of supersymmetric gauginos and sleptons with the ATLAS detector

Speaker

Federico Sforza

11:21-11:39

Search for electroweak SUSY production at CMS

Speaker

Pieter Everaerts

11:39-11:57

Charged Higgs probes of dark bosons at the LHC

Speaker

K.C. Kong

11:57-12:15

Search for heavy resonances with the ATLAS detector

Speaker

David Adams

12:15-12:33

Searches for New Physics in Multijet Final States

Speaker

Alexey Ferapontov

12:33
