HW commissioning to intermediate energy

Monday 3 March 2008 10:30 (35 minutes)

- o How can we achieve a machine commissioned for beam operation for mid June?
- o Objectives, advantages of HWC to intermediate energy.
- o How much time can we gain?
- o Can we achieve a commissioned machine for intermediate energy by mid-June? Critical issues for that?
- o Is there a safe limit to operate the magnets and the cryogenics for cold check-out, early physics?

Presenter: VERGARA-FERNANDEZ, Antonio

Session Classification: Session 1 - HWC experience & future plans
