DT2 Infos

Important for our future: Council approved additional 4 x 60 MCHF (2008-2011)

http://ph-dep.web.cern.ch/ph-dep/InfoCommunication/News/070622.html

Four Themes:

- i. Full exploitation of the LHC potential;
- ii. Optimization and modernisation of the injector complex;
- iii. Advanced R&D for LHC upgrade and for future accelerators and detectors;
- iv. Special projects.

R&D for tracking detectors and calorimeters; developments in microelectronics and opto-electronics with advanced 130 nm technology; improvements in Triggering, DAQ and controls.

Originally: 13.5 MCHF + 33 FTEs.

may drop!

Work is organized in 9 (10) work packages.

DT2 will to play an important role in 4 of them:

WP4: Rad hard Si tracking (SLHC). / RD50 collaboration

WP5: MPGD (GEM, micromegas & co.). / RD51 collaboration

WP6: Interconnect technologies.

WP7: Irradiation facilities & material + gas studies.

DT2 Infos

Budget: 2007 budget spent to close to 100%

2008 budget: request 12% more than 2006 allocation.

result of negotiation: allocation will be 6% above 2007.

Staff movements:

Fellows Manuel Fahrer, will work on Silicon Detectors,

Supervisor M. Moll, WP4

Another fellow, will work on ATLAS TRK upgrade

Matteo Alfonsi, will work on Micro Pattern Gas Detectors,

Supervisor L. Ropelewski, WP5, RD51

PhD Student Gabriele Croci, will work on MPGD

Supervisor L. Ropelewski, WP5, RD51

Associate Rob Veenhof, will work on Gas Detector Simulation

Supervisor L. Ropelewski, WP5, RD51

No retirements, however planned retirements in 2008: M. Delattre, E. Albrecht

DT2 Infos

Marie Curie Network MC-PAD (PArticle Detectors) approved.

CERN forms training network with DESY, GSI, PSI, Frascati, Nikhef, U Hamburg, Krakow, Ljubljana.

Coordination: CJ

Total EU funding: 4.7 M€

For DT2: 4 PhD / PostDoc positions → Silicon / Gas / Photodetectors / Gas Simulation.

Marie Curie Network CLOUD-ITN approved.

DT2 not directly involved, however the CLOUD project and DT2 will profit indirectly.

• MARS 2008

Procedure like in 2007. Budget for advancements 1.83% + 0.1% (carry over from 2007)

Rule: 50% of staff gets only periodic step. → ~35 additional steps for 30 staff.

All interviews should be done before 15 March.

Safety (a very complex subject)

Nov 2006 DG: New approach to safety implementation at CERN

- → Transfer of executive safety competences from SC to departments
- → SC remains in charge of safety policy and monitoring, radio protection, fire brigade
- → + lots of confusion, new committees, friction losses

http://cern.ch/safety-commission/SC-site/index.html

Safety must be handled in a more systematic, rigorous way, across all CERN. All our activities must become **auditable** in terms of safety.

How are we concerned?

- In 2008 a new tool, called SMS = Safety Management System, will be implemented.
- All safety risks need to be inventoried and evaluated. Activities directly linked to experiments and taking place in experimental areas are to be treated by the experiments.
- → For DT2 this means that we can limit SMS to our workshops and labs. Special (pre-filled) forms for workshops, labs etc. will be available.
- → Every person should have an objective related to safety in his/her MARS.
