→ Upgrade Scheduled in Summer 2014, Currently 1Gb/s

❖ Strong Support from Fresno State IT: Jay, Choa-lin, Mike Garvey, etc.

AtlasConnect: <http://atlas.ci-connect.net/>

- Set of computing services designed to use the existing resources used by US ATLAS people, focusing on batch processing.

Registrations and logins steps

- Sign-in to the identity management system <http://atlas.ci-connect.net/>
- InCommon Registration
 - This allows you to enroll using your existing campus identifier and credentials, provided that your home institution is a member of the InCommon Federation
- Globus Online Registration
 - you'll only need to provide your name, email address, a username you want to use, and a password. You will also need to validate your email address.
- Linking a Globus Online account
 - This will link your account information together, allowing you to sign in using your InCommon.

Tracking the jobs: Condor

Ongoing work

- ❑ Hardware upgrade:
 - ~100 Cores & ~45 TB to be added soon (funded by Fresno State)
- ❑ Testing the new setup(Atlas Connect):
 - Aim to test the system with i/o storage and we plan to test the system with jobs:
 - cpu intensive only ✓
 - cpu with minimal input and output data requirements
 - cpu with heavy input but minimal output
 - cpu with both heavy input and output
- ❑ Any other tests/suggestions?

Summary/Future Outlook

- Fresno State's Tier-3 has been working since 2011. Hardware/10 Gb network upgrades soon
- Goal: Provide these computing resources to ATLAS using ATLAS Connect
- Test-bed for ATLAS Connect configuration (Thanks Rob, Lincoln, and others for help!)
- Will work closely with ATLAS Connect people to validate the idea and provide the experience/documentation for other Tier-3's to follow

THANKS
