## Programming for Concurrency - Exercise 3

*Thursday, 19 June 2014 11:00 (1 hour)*

In these exercises the concepts behind resource protection are put to a good use. The opportunity is offered to design and develop different solutions for thread safety issues. The pre-digested solutions offered by widely known libraries and toolkits are compared. The student is also invited to test her knowledge using different programming languages.

**Presenter:** PIPARO, Danilo (CERN)

**Session Classification:** Programming for Concurrency
