

RHP-Technology: Possible Contributions to Tasks 11.2 and 11.3 and Work Proposals

Tuesday 10 December 2013 11:00 (30 minutes)

1. Presentation of advanced ceramics produced at RHP Technology (WC, MoC, SiC, TiC, ecc) with specific focus on highly conductive materials
2. Proposals for new heavy and conductive refractory materials (e.g. WC- or Mo₂C- based) as an alternative to present tungsten heavy alloys
3. Proposals for other SiC- based materials and their bonding to metallic substrates
4. Type and number of material samples to be produced.

Presenter: Mr NEUBAUER, Eric (RHP Technology)
