

## **Session Program**

**7-12 Sept 2014**

# **Quark Confinement and the Hadron Spectrum XI**

## ***Parallel V: E3 QCD and New Physics***

St. Petersburg

## Thursday 11 September

14:00

### Parallel V: E3 QCD and New Physics

**Session** | **Location:** Deyneka 1 | **Convener:** Huey-Wen Lin

14:00-14:25

#### Status of the theoretical prediction for the muon $g-2$

**Speaker**

Massimo Passera

14:26-14:50

#### The Q-weak Experiment: An Overview and Preliminary Analysis

**Speaker**

Mr Joshua Magee

14:51-15:16

#### Non-Standard Charged Current Interactions in Beta Decay: Sources and Prospects

**Speaker**

Susan Gardner

15:18-15:43

#### Theory of electric dipole moments of hadrons and nuclei

**Speaker**

Jordy de Vries

16:00
