Towards ROOT 6

Progress last weeks
Vassil Vassilev

ROOT 6 Beta Out

- A lot of issues fixed
- A few improvements in error recovery

Work items

- Various fixes and improvements in "Base class offsets" by Cristina

- Output redirection almost done (Cristina and I)
  ```
  .> myfile.log
  int I = 0
  printf("What is my name\n");
  .>
  ```

- Improvements in rootmaps (autoloading of templates) by Danilo

- Windows fixes by Bertrand

- Unloading of macros and template specialization
  ```
  #include <map>
  map<int, int> a
  .undo 1
  ```
