

Hot Quarks 2014

Saturday 27 September 2014

Session 12: Quarkonium II (17:00 - 20:35)

-Conveners: Lijuan Ruan

time	[id] title	presenter
17:00	[31] Measurement of Υ in $\boxed{p+p}$ collisions in the STAR experiment	KOSARZEWSKI, Leszek
17:20	[41] J/ψ production in the Statistical Hadronization Model - limitations and implications	Mr BAHAVAR, Philipp
17:40	[48] Inclusive J/ψ production in pp, p-Pb and Pb-Pb collisions at forward rapidity with ALICE at the LHC	MARTIN BLANCO, Javier
18:00	Coffee break	
18:30	[46] Forward rapidity $\psi(\mathit{2S})$ production in pp, p-Pb and Pb-Pb collisions with ALICE at the LHC	LEONCINO, Marco
18:50	[74] J/ψ production as a function of charged particle multiplicity in $p+p$ collisions at $\sqrt{s} = 510$ GeV	Mr YU, Haiwang
19:10	More discussions
