

Session Program

21-27 Sept 2014

Hot Quarks 2014

Session 7

Thursday 25 September

08:30

Session 7: Beam energy scan

Session | Convener: Hannah Petersen

08:30–09:05 **Overview of the BES results**

Speaker

Dr Marlene Nahrgang

09:05–09:25 **Beam energy scan using a 3+1D viscous hydro+cascade model**

Speaker

Iurii Karpenko

09:25–09:45 **Higher order fluctuations of conserved charges in heavy ion collisions**

Speaker

Miki Sakaida

09:45–10:05

Determination of freeze-out conditions from fluctuation observables measured at RHIC

Speaker

Dr Marcus Bluhm

10:05–10:35 **Coffee break**

10:35–10:55 **Recent results on event-by-event fluctuations in ALICE at LHC**

Speaker

Satyajit Jena

10:55–11:15

Charge dependence of identified two-hadron correlation relative to the reaction plane in Pb-Pb collisions measured with ALICE

Speaker

Jacobus Onderwaater

11:15–11:35 **Discussions**

12:15
