

Benasque 2014 workshop

After the discovery: hunting for a non-standard Higgs sector

April 06-18, 2014

<http://benasque.org/2014higgs/>

The workshop is approaching and we are looking forward to exciting discussions in Benasque.

As a second bulletin, here is some updated information about the workshop:

- if you haven't done it yet, you should confirm your participation with the Benasque secretaries as soon as possible (if your travel plans have changed, please let them -and us too, since we need to plan the activities - know asap!).
- since the workshop partly overlaps with the Easter break, we advise you to book your accommodation as soon as possible by filling in the form you received from the secretaries.
- we remind you that if you are planning to reach Benasque with the workshop bus, you need to book a seat with the secretaries.
- the first week of the workshop will schedule a series of review talks aimed at triggering some discussions that will continue during the workshop. There won't be any formal working groups with conveners but we kind of expect that the speakers will animate/stimulate discussions during part of the workshop and will serve as the contact person for his/her topic. You'll find a tentative timetable <https://indico.cern.ch/event/289711/other-view?view=standard>.
- in addition, there will also be time available for some short contributed talks for those of you who are interested in presenting some results. Please contact us by email.

On the logistic side: (see <http://benasque.org/2014higgs/> for details)

- bus rides will be organized on Sunday April 6 afternoon and Sunday April 13 afternoon from Barcelona to Benasque
- there will be two return buses from Benasque to Barcelona on Saturday April 12 morning and Friday April 18 morning.
- a small reception (Spanish pica-pica) will be organized on Monday April 7.

See you soon in the Spanish Pyrenees,
Aurelio, Christophe, Filip and Ian.
