

Session Program

5 January 2014

Future Prospects in High Energy Physics - Symposium in honor of the 60th birthday of Halina Abramowicz

Session 2

Tel Aviv University, lecture hall of Beit- Hatfutsot
School of Physics and Astronomy, Ramat Aviv, 69978 Tel Aviv, Israel

Sunday 5 January

11:00

Session 2

Session |**Location:** Tel Aviv University, lecture hall of Beit- Hatfutsot, School of Physics and Astronomy, Ramat Aviv, 69978 Tel Aviv, Israel |**Convener:** Yaron Oz

11:00-11:30

Dynamic Quantum Clustering (DQC) facilitates visual exploration of big data

Speaker

David Horn

11:30-12:00

Diffraction at HERA

Speaker

Prof. Claudia Beatriz Glasman Kuguel

12:00-12:30

After the first LHC phase

Speaker

Stefan Pokorski

12:30
