

CMS Concerns for SRM v2.2

- Protecting space from (mis)-use
 - Top priority
- Tokens for srmBringOnline
 - (Almost) top priority; CMS needs improved prestaging
- Implementations fully VOMS-aware
 - (?) I'm sorry, I don't understand what is lacking.
- Correct implementation of GetSpaceMetadata
 - Low Priority
- Selecting tape sets
 - Medium priority; most sites have not complained heavily about the current abilities.

Warning: Not official
