

# 2014 CAP Congress / Congrès de l'ACP 2014

## Monday, 16 June 2014

### (M2-4) Neutrinos Long Baseline PPD-DNP / Neutrinos sur de longues distances - PPD-DPN - C-112 (15:45 - 17:15)

-Conveners: Zoltan Gecse

| time  | [id] title   | presenter             |
|-------|--|-----------------------|
| 15:45 | [22] A long distance for the smallest particle: recent results from long baseline neutrino experiments | MAHN, Kendall         |
| 16:15 | [177] Neutrino Cross Sections at the T2K Near Detectors  | Dr SCOTT, Mark        |
| 16:30 | [176] Identifying Charged Current Single Pion Production Neutrino Events at Super Kamiokande           | BERKMAN, Sophie       |
| 16:45 | [181] The NuMu and anti-NuMu interaction rate measurements in the T2K near detector                    | Dr HILLAIRET, Anthony |
| 17:00 | [175] Using the T2K near detector in neutrino oscillation measurements                                 | MYSLIK, Jordan        |
