

Phenomenology 2014 Symposium

Contribution ID: 105

Type: parallel talk

3rd generation SUSY searches at CMS

Monday, 5 May 2014 14:45 (15 minutes)

In this talk, the latest results from CMS on searches for stop and sbottom squarks are presented. Searches for direct squark production and indirect production through gluino cascades in a variety of decay channels are reviewed. The results are based on 20/fb of data collected during the 8 TeV LHC run.
