

Session Program

18-23 May 2014

Blois2014: 26th Rencontres de Blois on "Particle Physics and Cosmology"

QCD + HF + EW

Gaston d'Orléans
Château de Blois, Blois, Loire Valley, France

Tuesday 20 May

16:30

QCD + HF + EW: Parallel Session

Session | **Location:** Room III | **Convener:** Kamila Kowalska

16:30–16:50 Measurements of Heavy Flavour Production at ATLAS and CMS

Speaker

Konstantin Toms

16:50–17:10 Latest results in rare decays at LHCb

Speaker

Michal Kreps

17:10–17:30 CP violation in the B system at LHCb

Speaker

Matthew Reid

17:30–17:50 Hadronic b decays and the Unitarity triangle angle gamma at LHCb

Speaker

Jeremy Dalseno

17:50–18:10 Charm mixing and CP violation at LHCb

Speaker

Evelina Gersabeck

18:10–18:30

Searches for New Physics in Charm and Bottom Decays at the Tevatron

Speaker

Mark Williams

18:30–18:50 Measurements of Heavy Flavour Properties at ATLAS and CMS

Speaker

Ilse Kratschmer

18:50–19:10 b and c hadron spectroscopy at LHCb

Speaker

Antonio Alves

19:10–19:30 Recent Results on Quarkonium(-like) states at B-factories

Speaker

Ruslan Chistov

19:30–19:50 XYZ physics at the BESIII experiment

Speaker

Zhiqing Liu

19:50
