Tools and Techniques - Exercise 6

Tuesday 26 August 2014 19:15 (45 minutes)

After the two-person teams acquire additional experience with the code management and release tools in exercise 4 and 5, in exercise 6 we will group projects to demonstrate some of the real-world issues discussed in the lecture. Groups of two teams will first work together to create a functional release from individual sub-projects at various stages of completion to show the strengths and weaknesses of test and release tools. This is followed by a larger scale exercise with groups of multiple teams.

Presenter: JACOBSEN, Robert (Lawrence Berkeley National Laboratory (LBNL))

Session Classification: Data Analysis
