## Inclusive production of t, W, Z + jets

Tuesday 12 August 2014 12:15 (25 minutes)

This talk is expected to give an overview of precision measurements of the production of top (pairs), W and Z bosons, with or without additional (light or heavy) jets at the LHC. The talk should cover both the inclusive cross-sections and differential distributions or ratios, show comparisons with theory predictions, and discuss prospects for future measurements at the LHC (and possibly beyond).

Presenter: CHEN, Chunhui (Iowa State University (US))Session Classification: Standard Model Physics
