

## Run 1 legacy performance: Jets/ETMiss/tau

*Monday 11 August 2014 16:10 (20 minutes)*

In this talk, the run 1 legacy performance of jet, missing transverse energy and tau reconstruction in the ATLAS and CMS experiments will be described, as well as the associated systematic uncertainties. The two speakers should try to enlight the differences of performances between the two experiments, and explain what worked better/worse than planned, as well as the lessons for the run 2.

**Presenters:** Dr SAKUMA, Tai (University of Bristol (GB)); SUMIDA, Toshi (Kyoto University (JP))

**Session Classification:** LHC Run 1 Legacy
