

Circular e+e- colliders

Thursday 14 August 2014 10:35 (25 minutes)

The talk is expected to cover the following aspects: (i) parameters, running modes, expected performance at different energies; (ii) key ingredients, readiness, possible time schedule; (iii) strategy for beamstrahlung & momentum acceptance; (iv) polarization options; (v) possible running at and importance of 400-500 GeV c.m.?

Presenter: OIDE, Katsunobu (KEK)

Session Classification: Future Machines
