

Exotic quarkonium-like spectroscopy

Monday 11 August 2014 14:25 (15 minutes)

Review of recent results concerning the new “quarkonium-like” states (or X, Y, Z states): spectroscopy of these states, measurements of their properties (spin, mass, width, decay modes, ...) that can help understanding their nature.

Presenter: BONDARENKO, Olga (KVI (Netherlands))

Session Classification: Parallel Session 4
