

# NUFACT 2014 Farewell and Thanks

NUFACT 2014,  
Glasgow, 25-30 August 2014,  
Paul Soler

University  
of Glasgow

# NUFACT 2014

- I hope you had a constructive and enjoyable NUFACT workshop
- I thought the scientific programme was excellent and there was progress on a large number of fronts

# Scientific Programme Committee

- Yesterday evening we had a meeting of the Scientific Programme Committee
- We had a discussion on the focus of the NUFACT series, and decided that we should make more of an emphasis that it is a meeting for all accelerator-based (man-made) neutrino and muon sources and is not limited to neutrino factories and added a Neutrino Theory working group to the programme
- We discussed frequency of meetings and we will continue with yearly workshops
- Rio de Janeiro was adopted as organizers of NUFACT 2015
- Expression of interest from Vietnam (2016), and also interest from a European institute in 2017 and a US institute 2018
- International Neutrino Summer School (INSS) will continue link to NUFACT, after a very successful INSS 2014 at St Andrews

# Thank you

- Thank you to all the working group convenors and the NUFAC Scientific Programme Committee for putting together the programme and running the meeting
- Thank you to outgoing European convenors:
  - Enrique Fernandez Martinez, Luis Alvarez Ruso, Jaroslav Pasternak and Giovanni Signorelli
- Thank you to the Conference Service of the University of Glasgow for the quiet organization behind the scenes, in particular Ishbel Duncan and Jean Lindsay
- Thank you to the local organizing team:
  - Valerie Flood, Ryan Bayes and John Nugent
- Farewell, have a safe trip back home and ...

# NUFACT 2015

□ ... see you next year at CBPF, Rio de Janeiro, Brazil

10-15 August 2015
