

CLARIN

Common Language Resources and Technology Infrastructure

Status CLARIN FIM work

Daan Broeder

FIM4R meeting Frascati 2014

Status

- To overcome limited attribute release via eduGain **CLARIN runs its own CLARIN Service Provider Federation (SPF)**
- CLARIN ERIC makes contracts with the individual national IDFs, a new more general SPF agreement was drawn up recently
- CLARIN has its own CLARIN Homeless IdP and discovery service
- Current SPF status:
 - 17 SPs signed up, including a US SP (3 not connected to all IDFs)
 - 7 IDFs (3 via HAKA's Kalmar Union connection)
 - ~200 relevant! IdPs can connect, still more than available via eduGain (150)
- Nevertheless: good news that more national IDFs adopt an eduGain opt-out policy as we hear from Italy and France
- Persistent problem is limited attribute release of IdPs also within their national IDF

Future

- CLARIN now also requires Data Protection CoCo as a CLARIN centre requirement to support its uptake
- Talks with DARIAH & CESSDA about sharing resources
- CLARIN supports the RDA FIMig with extension to US centres
- Could use 'Federation Services' as a service
