

QM 2011 - XXII International Conference on Ultrarelativistic  
Nucleus-Nucleus Collisions

Contribution ID: 99

Type: **Plenary**

## PHENIX Highlights

*Monday, 23 May 2011 10:40 (25 minutes)*

After establishing the creation of dense partonic matter in the early years of RHIC, the focus of recent experimental and theoretical effort has been to determine the properties of this partonic medium. With the advent of the LHC, there is now a new aspect to this quest: are the properties of the medium created at the LHC different from that created at RHIC? In this light, we will present the latest experimental results of the PHENIX collaboration, further constraining the properties of the sQGP at RHIC.

**Presenter:** Dr BATHE, Stefan (RIKEN-BNL Research Center)

**Session Classification:** Overviews
