

Session Program

14-17 Oct 2008

CLIC08 Workshop

Injectors & Damping Rings Wkg

CERN, 500/1-001 - Main Auditorium

Wednesday 15 October

08:30

Injectors & Damping Rings Wkg

Session | Location: CERN, 354/1-001

08:30-09:00 CLIC Injector Complex Review

Speaker

Louis Rinolfi

09:00-09:10 Discussion

09:10-09:30 Overview of DR to ML Transport

Speaker

Dr Frank Stulle

09:30-09:40 Discussion

09:40-10:00 Beam dynamics in the Linacs

Speaker

Andrea Latina

10:00-10:10 Discussion

10:10-10:30 Coffee break

10:30-10:50 Collective Effects in the Transfer Lines and Damping rings

Speaker

Giovanni Rumolo

10:50-11:00 Discussion

11:00-11:20 An Hybrid Positron Sources for CLIC

Speaker

Dr Robert Chehab

11:20-11:30 Discussion

11:30-11:50 ILC/CLIC Common Issues for Compton

Speaker

Prof. junji urakawa

11:50-12:00 Discussion

12:00-12:20 Optical Cavity and Laser System for the Compton

Speaker

Dr alessandro variola

12:20-12:30 **Discussion**

12:30-14:00 **Lunch break**

14:00-14:20 **Undulator Scheme for CLIC**

Speaker
Dr Wei Gai

14:20-14:30 **Discussion**

14:30-14:50 **Undulator Option for Polarized e+**

Speakers
Ian Bailey, Lei Zang

14:50-15:00 **Discussion**

15:00-15:20 **Surface Treatment for e- Cloud Mitigation**

Speaker
Mauro Taborelli

15:20-15:30 **Discussion**

15:30-15:50 **Coffee break**

15:50-16:20 **CLIC Damping Rings Overview**

Speaker
Yannis Papaphilippou

16:20-16:30 **Discussion**

16:30-16:50 **Nb3Sn Wiggler Design Progress**

Speaker
Remo Maccaferri

16:50-17:00 **Discussion**

17:00-17:20 **NbTi Wiggler Design Progress**

Speaker
Pavel Voblyy

17:20-17:30 **Discussion**

17:30-18:00 **General Discussion**

18:00
