

21st International Conference on Computing in High Energy and Nuclear Physics (CHEP2015)

Contribution ID: 186

Type: oral presentation

Overview of Different Exciting Technologies Being Researched in CERN openlab V

Tuesday, April 14, 2015 3:30 PM (15 minutes)

CERN openlab is a unique public-private partnership between CERN and leading ICT companies. Its mission is to accelerate the development of cutting-edge solutions to be used by the worldwide HEP community. Since January 2015 openlab phase V has started. To bring the openlab conducted research closer to the experiments, phase V has been changed to a project based structure which allows research being done not only in CERN IT but also directly in the different experiments or even in different research institutes. In this talk I will give an overview of the different exciting technologies being researched by CERN openlab V.

Primary author: RADEMAKERS, Fons (CERN)

Presenter: RADEMAKERS, Fons (CERN)

Session Classification: Track 5 Session

Track Classification: Track5: Computing activities and Computing models
