

# MICE VC – MOM report

- *Daily MOM walkabout now decoupled from MOM's other duties*
- *John & me will share the walkabout from now on*
- *Revised ISIS MOM appointment form: re-draft given to the MEMO for comment*
  - *Will be tabled at next MICE/ISIS safety meeting*
  - *The formal MOM duty list is either under construction or complete*
- *Can only really comment on the last month's walkabout – completely uneventful!*
  - *Damaged VME crate in DAQ rack*
  - *Hall A/C behaving itself almost*
  - *Beam shutter hydraulics are suspect – must fix for Step IV*
  - *D1, D2, Q1-9 exercise planned for Friday*
  - *As is target run with frame raised*

# MICE VC – MOM report

- *Decay solenoid revival is taking some time*
  - *Should be fitting new shaft seal in Linde compressor next week*
  - *If that goes to plan, might be cold by Easter...*
  - *....then PSU commissioning, etc*
  - *Manufacturers confirm that inactivity is probably cause of seal problems*
  - *Need to plan in monthly compressor running and/or planned replacement of seal before a long run*
  - *80K hour service scheduled for August shutdown*
- *Other stuff:*
  - *Crane re-work complete by Friday*
  - *Ex TIARA RF installation should be back at DL in two weeks*
  - *Tracker installation week still good for w/b 24<sup>th</sup> March*
  - *R78 target back together and running after re-fit*
  - *Mods to EMR enclosure on hold due to other priorities*
  - *Aiming to move SS#2 into R5.2 w/b April 7<sup>th</sup>*
