

2.1 How experiments start (CERN)

Monday 19 May 2014 15:00 (15 minutes)

Even a small or medium size High Energy Physics experiment requires nowadays an important capital investment. To get a new experiment approved many problems have to be solved and fund raising is only one of them. This talk will not look at the cost book of an experiment, but it will give hints how a group of physicists can manage to get an experiment of the ground.

Presenter: HAHN, Ferdinand (CERN)

Session Classification: Session 2
