

3.5 ATLAS as an example of a large scientific collaboration (CERN)

Tuesday 20 May 2014 10:00 (15 minutes)

How do large scientific collaborations work? ATLAS as a case. The presentation will give an overview how large scientific projects such as the LHC experiments are governed and funded and what type of instruments (MoUs) are used to execute them.

Presenter: NORDBERG, Markus (CERN)

Session Classification: Session 3
