

Tour

Following 3 places are opened for visitors:

- 1) Nextef (New X-band Test Facility);
- 2) Ultra-precise Machining Laboratory Clean room;
- 3) High Precision Measuring Room;

We will organize 3 tour groups before we leave the tour.
Please attend at the entrance hall after the photo session.

A bus takes you to the tour places from one to another. Ueno san will guide you (he is to be a tour conductor). Please follow his guidance.

Nextef is in a radiation controlled area in KEKB injector Hall.
We will ask two people in each group to wear radiation batch, since Nextef is located in the controlled area.

Other MEC facilities are not the controlled area.

Planned Schedule
