

# Status of office space for ABP

Ghislain Roy

Space Manager for Beams Department

ABP Information Meeting

10 April 2014

# Space Management

Space is in the form of buildings, tunnels, roadworks, outside areas... and their subdivisions, ie offices, halls, labs, workshops, parking lots etc...

Space is owned by CERN

CERN allocates space to departments, groups, teams, experiments **on the basis of a justified and ongoing need.**

Space managers receive the mandate from their department heads to coordinate space allocation and monitor space usage in their departments, and to coordinate space allocation at CERN level.

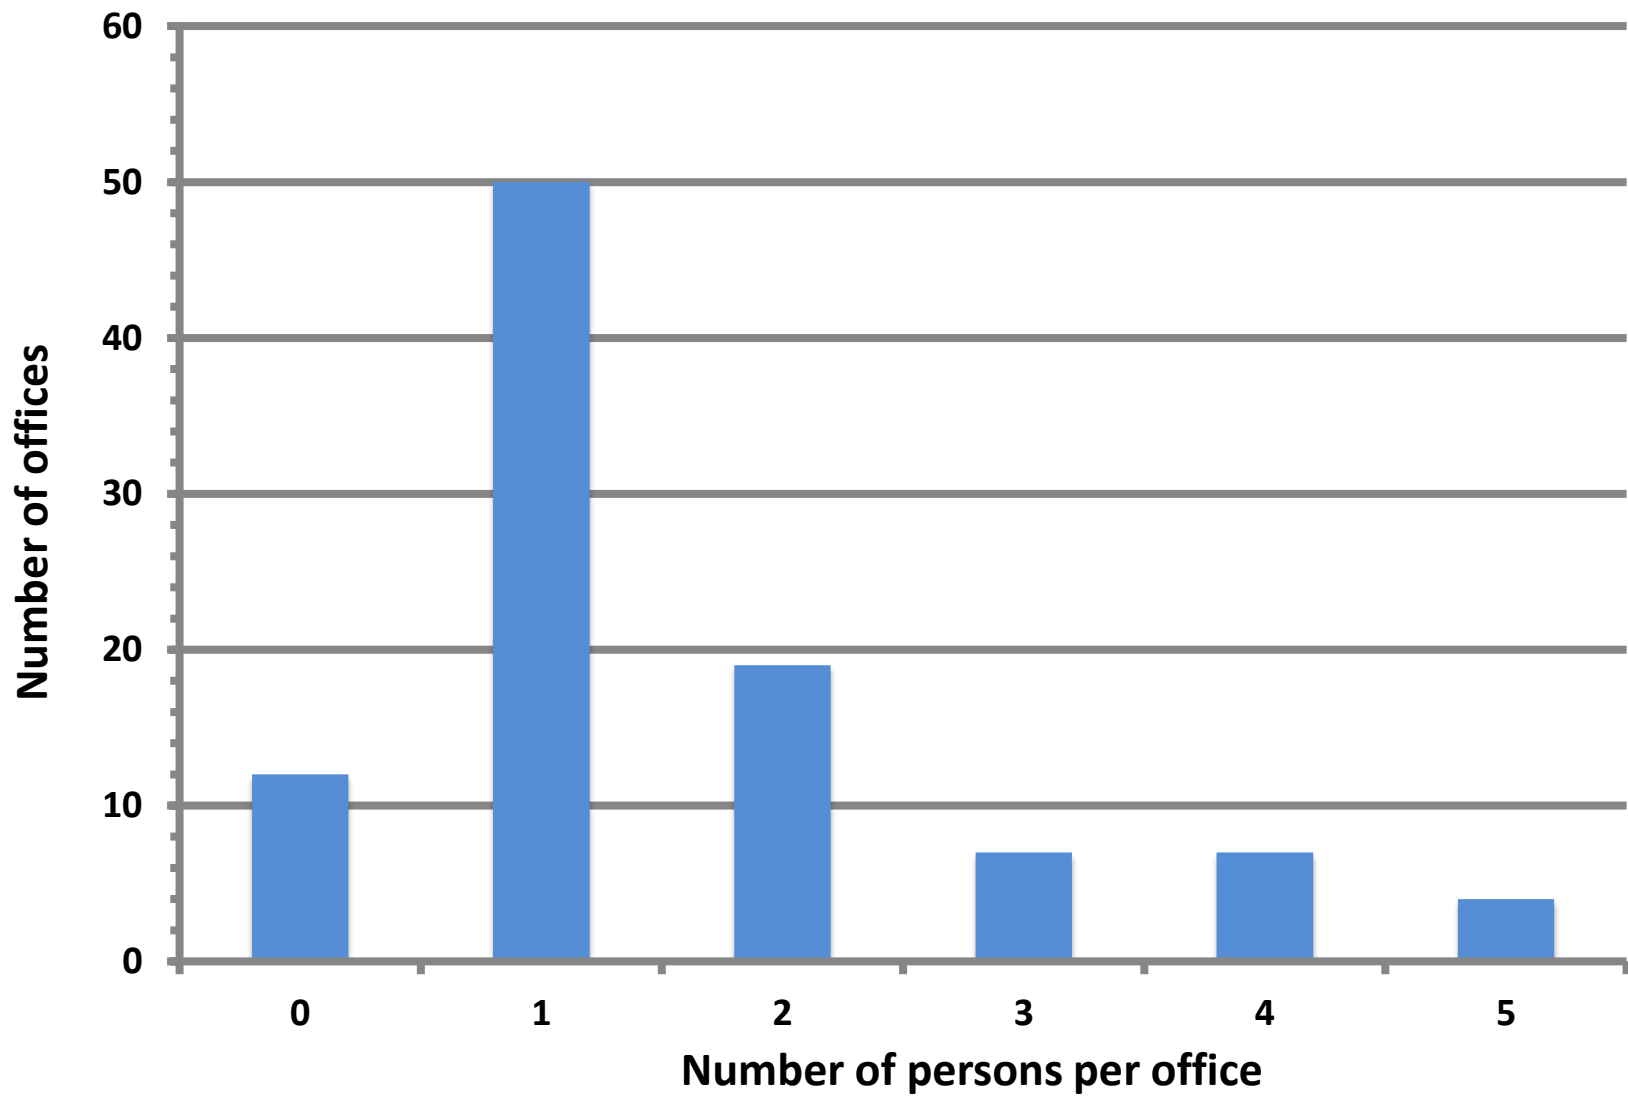

Space is a valuable **resource which must be managed.**

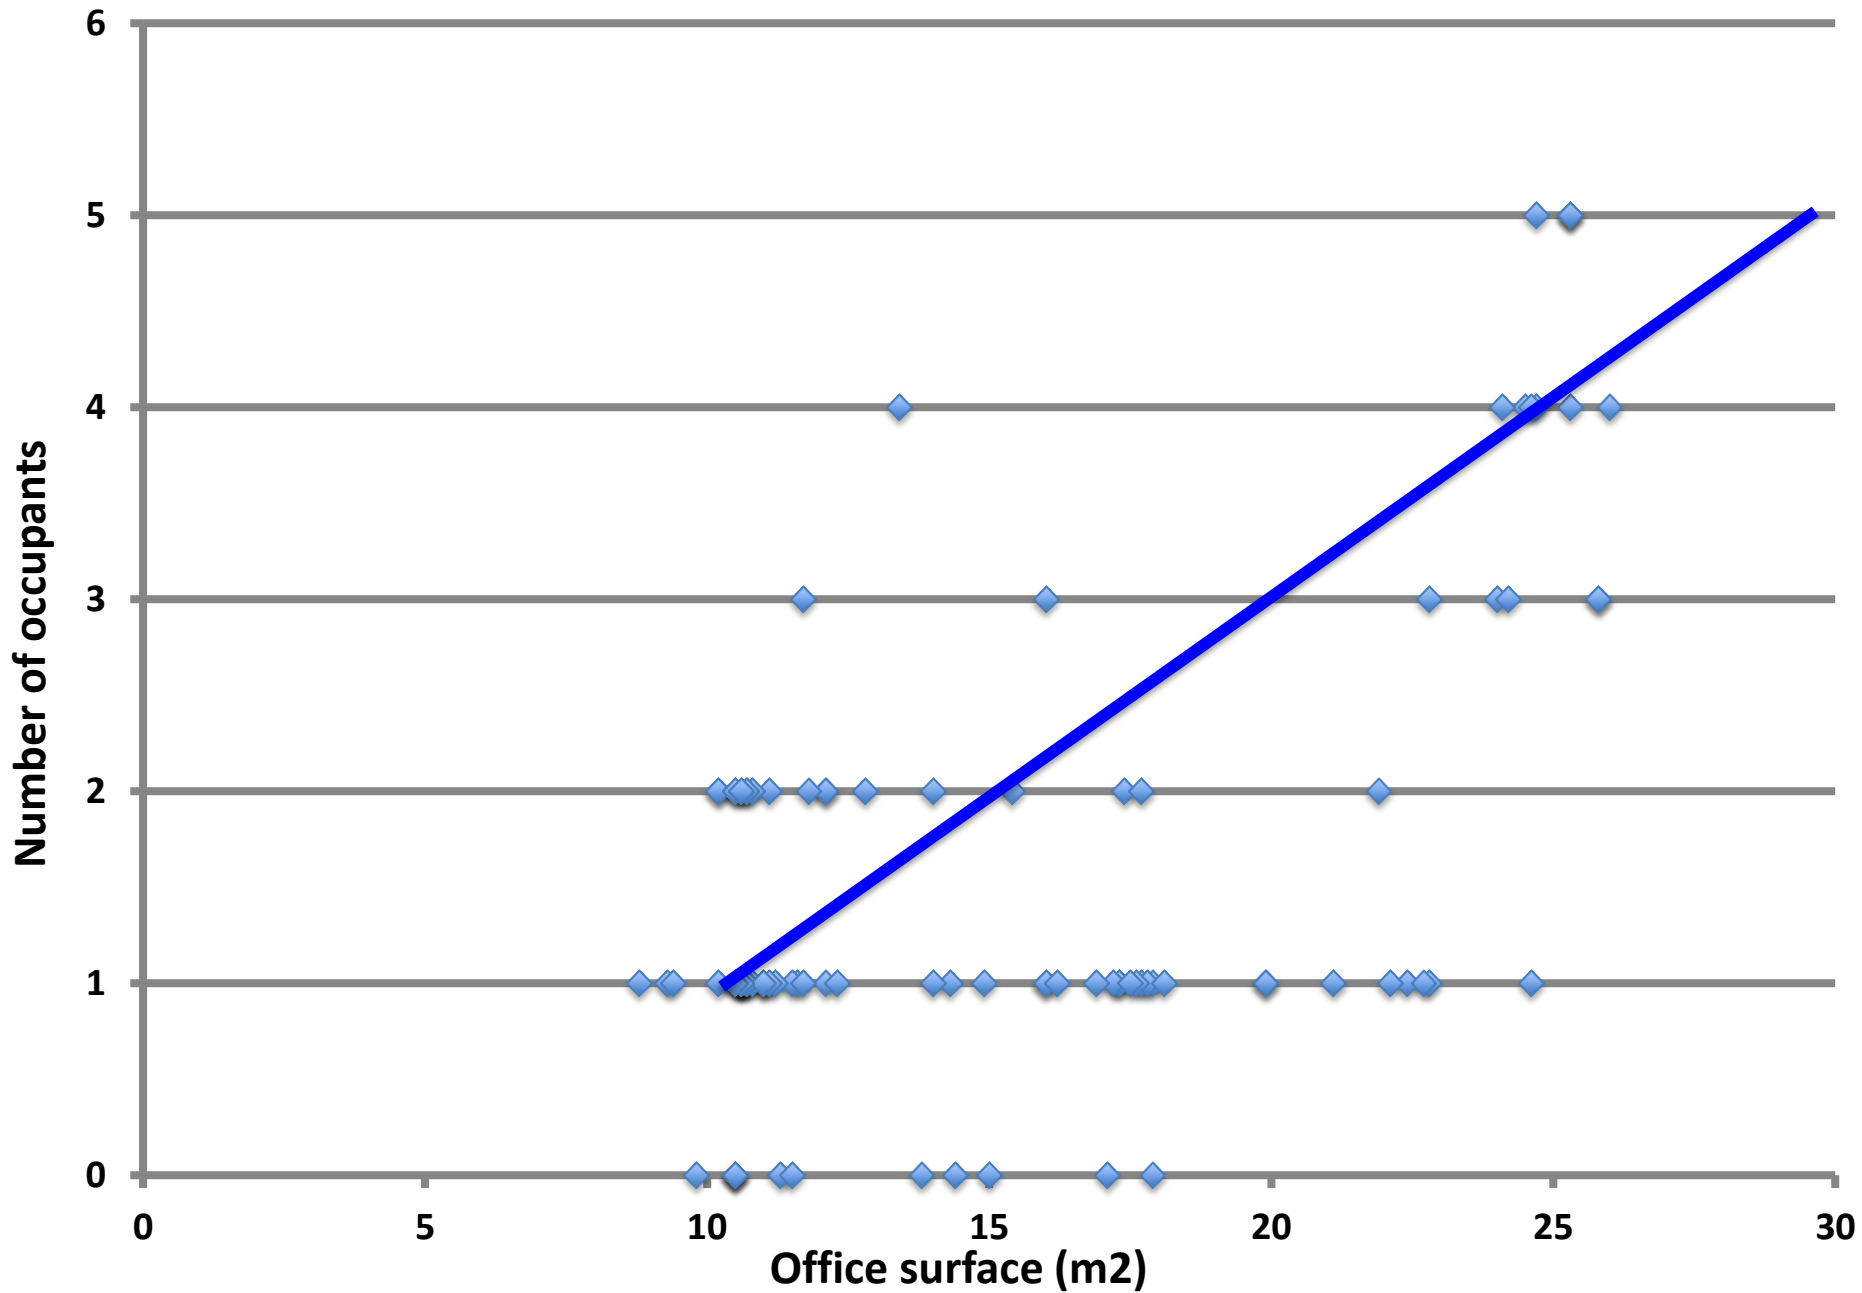

# ABP Office situation

Over 150 staff, fellows, students, associates, visiting collaborators, honorary members...

About 100 offices and about 1600 m<sup>2</sup>

ABP offices are all on Meyrin site,  
and very PS-centric (6, 8, 9, 10, 17, 18, 19, 561, 628)

# Oncoming change...

- 628 is rented and to be liberated by Sept. 2014.  
13 persons to be relocated,  
still no identified destination.
- Trying to expand ABP in 18/19  
across the PS courtyard via the bridge.
- Two large open space offices for honorary  
members in 37 (PSB)
- This will free some (limited) space in 561  
(centre-anneau)
