ADCoS weekly Report
21.05.2014 - 27.05.2014.

ADCoS Expert Shifters Point of view

Kai Leffhalm
ADC Weekly
Desy, May 27, 2014

Shift coverage

> Only one senior shift not covered
> Two trainee shifters,
  - one will be promoted
> Next week:
  - Expert shift is covered
  - Only two shifts still not covered (Mo,Tu)

Issues solved during the week

Central Services

> Global CVMFS ATLAS CONDB down for e few hours (GGUS: 105646)

T1s

> Taiwan: one srm down (GGUS 105640)
  - killed site services
  - ⇒ high number of transferring jobs in IT
> Taiwan-LCG2 had staging errors: glitch with tape-mount (GGUS: 105497)
> squid.grid.sara.nl is now a round robin alias that points to squid01 and squid02 (GGUS 104697)

Issues still open after the week

Central Services/T0

- > VO-boxes degraded again and again (ELOG 49446 and replies)
  - SiteServices: staging, FZK, RAL, CNAF/ASGC
  - stable since yesterday
  - it seemed to be a rucio problem (ELOG 49517)
- > Files tried to be transferred from NDGF and FZK (JIRA 4677/4678)
  - they do not exist, creating job failed

T1s

- > IN2P3-CC: small amount of staging errors, investigating (GGUS 105775)
- > RAL-LCG2: Jobs at RAL-LCG2_MCORE (GGUS 105308)
  - Seems to be a problem to run more than 1 multicore job on one node
