

High Energy Strong Interactions: A School for Young Asian Scientists

Monday, 22 September 2014 - Friday, 26 September 2014

Central China Normal University

Book of Abstracts

Contents

Welcome	1
Gluon Saturation and Factorization Issues at Small-x	1
Fluctuating Initial Conditions for Hadronic and Heavy-Ion Collisions	1
A Review of the Search for Chiral Effects at STAR	1
Partial Restoration of Chiral Symmetry Inside Color Flux	1
Collective Modes and Kosterlitz-Thouless Transition in a Magnetic Field in Planar NJL Model	1
Vorticity and Magnetic Field Production in Relativistic Ideal Fluids	1
Two-particle Rapidity Correlations in A Glasma	2
Chiral Plasma Instabilities in Quark-Gluon Plasmas and Magnetars	2
Charge Asymmetry Dependence of π/K Anisotropic Flow at RHIC: the Study of Chiral Magnetic Wave	2
Discussions	2
Particle Correlations at Variable pT Range at RHIC-STAR	2
Observation of Jet Quenching and the Modification of Heavy Flavour Objects in CMS Heavy-Ion Experiment	2
Momentum Transport in Dijet+QGP-fluid System	2
The Interaction of Jets and Medium	3
Heavy Quark Correlations and the Effective Volume for Quarkonia Production	3
Recent Results in Relativistic Heavy-Ion Collisions from ALICE and Korean Activities on the ALICE Experiment at the LHC	3
Dielectron Production in Au+Au Collisions at RHIC	3
Study for Dielectron Asymmetry in Au+Au Collisions at PHENIX	3
Dielectrons from Charm and Bottom Meson Decays in p-Pb Collisions at 5.02 TeV Measured With the ALICE Detector	3
Low pT Non-Photonic Electron Production in AuAu Collisions at 200 GeV	3

Neutral Pion Analysis with High-Energy Photon Trigger in pp Collisions with ALICE . . .	4
Energy Loss of Charm Quark in Quark Gluon Plasma and Its Consequences	4
Jet Measurements in pp, p–Pb and Pb–Pb Collisions Using the ALICE at the LHC	4
Azimuthal Anisotropy for Multi-strange Hadrons as Penetrating Probe in High-Energy Heavy-Ion Collisions at RHIC	4
Thermalization of Gluons with Bose-Einstein Condensation	4
Measurement of Direct Photon Azimuthal Anisotropy in Au+Au 200 GeV Collisions at RHIC-PHENIX Experiment	4
Flow and pA Collisions: Is It Hydrodynamics or Something Else?	5
QGP and Nonperturbative Physics	5
Azimuthal Sensitive HBT in Pb+Pb 2.76 TeV Collisions at LHC-ALICE Experiment	5
Measurement of Anisotropic Radial Flow in Relativistic Heavy-Ion Collisions	5
Quarkonium Formation Time in Relativistic Heavy-Ion Collisions	5
Azimuthal Anisotropy Fluctuations in Heavy-Ion Collisions and Flow Response	5
Discussions	6
A Simple Idea for Lattice QCD at Finite Density	6
Magnetism and Rotation on the Lattice	6
Thermodynamic of Heavy-Light Hadrons	6
Beam Energy Scan and the QCD Equation of State	6
Exploring the QCD Phase Diagram for a Signature of the Critical Point	6
Search for the QCD Critical Point: Higher Moments of Net-proton Multiplicity Distributions at STAR	6
Generalized Susceptibilities Along the Phase Boundary from the 3-d, 3-State Potts Model	7
Inhomogeneous Polyakov Loop Induced by Inhomogeneous Chiral Condensates	7
Electromagnetic Field and Anomalous Transport in Heavy-Ion Collisions and Cold Atoms	7
Thermodynamic Uncertainty Relation and non-Gaussian Statistics	7
Exotics from Heavy-Ion Collision	7
Recent Activities on Pixel Detector for High-Energy Physics	7
Particle Identification at sPHENIX	7
A Matrix Model for Isospin Matter	8
Nuclear Symmetry Energy in QCD Degree of Freedom	8

End of the Workshop	8
Weibull Model of Multiplicity Distribution in Hadron-Hadron Collisions	8
Study of the Effective Field Theory for Magnons	8
Deconfinement Phase Transition in the Heavy Quark Region	8
Effect of Anisotropy on HBT Radii Using Leptonpair Interferometry	8
Non-Perturbative Heavy Flavor Transport in Medium	9

Session I: Initial Conditions and Chiral Effects / 6

Welcome

Session I: Initial Conditions and Chiral Effects / 7

Gluon Saturation and Factorization Issues at Small-x

Corresponding Author: bo.w.xiao@gmail.com

Session I: Initial Conditions and Chiral Effects / 8

Fluctuating Initial Conditions for Hadronic and Heavy-Ion Collisions

Corresponding Author: ptribedy@bnl.gov

Session I: Initial Conditions and Chiral Effects / 11

A Review of the Search for Chiral Effects at STAR

Corresponding Author: gwang@physics.ucla.edu

Session I: Initial Conditions and Chiral Effects / 12

Partial Restoration of Chiral Symmetry Inside Color Flux

Corresponding Author: iritani@post.kek.jp

Session I: Initial Conditions and Chiral Effects / 13

Collective Modes and Kosterlitz-Thouless Transition in a Magnetic Field in Planar NJL Model

Corresponding Author: caogaoqing@126.com

Session I: Initial Conditions and Chiral Effects / 14

Vorticity and Magnetic Field Production in Relativistic Ideal Fluids

Session I: Initial Conditions and Chiral Effects / 15

Two-particle Rapidity Correlations in A Glasma

Session I: Initial Conditions and Chiral Effects / 16

Chiral Plasma Instabilities in Quark-Gluon Plasmas and Magnetars

Corresponding Author: nyama@rk.phys.keio.ac.jp

Session I: Initial Conditions and Chiral Effects / 17

Charge Asymmetry Dependence of π/K Anisotropic Flow at RHIC: the Study of Chiral Magnetic Wave

Corresponding Author: qyshou@rcf.rhic.bnl.gov

Session I: Initial Conditions and Chiral Effects / 18

Discussions

Session II: Jets and their interactions with the medium / 19

Particle Correlations at Variable p_T Range at RHIC-STAR

Corresponding Author: hua.pei@cern.ch

Session II: Jets and their interactions with the medium / 20

Observation of Jet Quenching and the Modification of Heavy Flavour Objects in CMS Heavy-Ion Experiment

Corresponding Author: yongsun.kim@cern.ch

Session II: Jets and their interactions with the medium / 21

Momentum Transport in Dijet+QGP-fluid System

Corresponding Author: yasuki.tachibana@mail.ccnu.edu.cn

Session II: Jets and their interactions with the medium / 22

The Interaction of Jets and Medium

Corresponding Author: guangyou.qin@gmail.com

Session II: Jets and their interactions with the medium / 23

Heavy Quark Correlations and the Effective Volume for Quarkonia Production

Corresponding Author: liuyp06@mails.tsinghua.edu.cn

Session II: Jets and their interactions with the medium / 24

Recent Results in Relativistic Heavy-Ion Collisions from ALICE and Korean Activities on the ALICE Experiment at the LHC

Corresponding Author: min.jung.kweon@cern.ch

Session II: Jets and their interactions with the medium / 25

Dielectron Production in Au+Au Collisions at RHIC

Corresponding Author: jiezhao1119@gmail.com

Session II: Jets and their interactions with the medium / 26

Study for Dielectron Asymmetry in Au+Au Collisions at PHENIX

Corresponding Author: tomoya.hoshino@cern.ch

Session II: Jets and their interactions with the medium / 27

Dielectrons from Charm and Bottom Meson Decays in p-Pb Collisions at 5.02 TeV Measured With the ALICE Detector

Corresponding Author: shinichi.hayashi@cern.ch

Session II: Jets and their interactions with the medium / 28

Low p_T Non-Photonic Electron Production in AuAu Collisions at 200 GeV

Corresponding Author: kunsuoh@gmail.com

Session II: Jets and their interactions with the medium / 29

Neutral Pion Analysis with High-Energy Photon Trigger in pp Collisions with ALICE

Corresponding Author: satoshi.yano@cern.ch

Session II: Jets and their interactions with the medium / 30

Energy Loss of Charm Quark in Quark Gluon Plasma and Its Consequences

Corresponding Author: younus.presi@gmail.com

Session II: Jets and their interactions with the medium / 31

Jet Measurements in pp, p-Pb and Pb-Pb Collisions Using the ALICE at the LHC

Corresponding Author: sidharth.kumar.prasad@cern.ch

Session III: Collectivity / 32

Azimuthal Anisotropy for Multi-strange Hadrons as Penetrating Probe in High-Energy Heavy-Ion Collisions at RHIC

Corresponding Author: hiroshi.masui@cern.ch

Session III: Collectivity / 33

Thermalization of Gluons with Bose-Einstein Condensation

Corresponding Author: xuzhe@mail.tsinghua.edu.cn

Session III: Collectivity / 34

Measurement of Direct Photon Azimuthal Anisotropy in Au+Au 200 GeV Collisions at RHIC-PHENIX Experiment

Corresponding Author: sanshiro.mizuno@cern.ch

Session III: Collectivity / 35

Flow and pA Collisions: Is It Hydrodynamics or Something Else?

Corresponding Author: mclerran@mac.com

Session III: Collectivity / 36

QGP and Nonperturbative Physics

Corresponding Author: gariwulf@hanmail.net

Session III: Collectivity / 37

Azimuthal Sensitive HBT in Pb+Pb 2.76 TeV Collisions at LHC-ALICE Experiment

Corresponding Author: naoto.tanaka@cern.ch

Session III: Collectivity / 38

Measurement of Anisotropic Radial Flow in Relativistic Heavy-Ion Collisions

Session III: Collectivity / 39

Quarkonium Formation Time in Relativistic Heavy-Ion Collisions

Session III: Collectivity / 40

Azimuthal Anisotropy Fluctuations in Heavy-Ion Collisions and Flow Response

Corresponding Author: goodwill.yan@gmail.com

Session III: Collectivity / 41

Discussions

Session IV: Lattice Results and Search for QCD critical point / 42

A Simple Idea for Lattice QCD at Finite Density

Corresponding Author: gavai@theory.tifr.res.in

Session IV: Lattice Results and Search for QCD critical point / 43

Magnetism and Rotation on the Lattice

Corresponding Author: arayamamoto@nt.phys.s.u-tokyo.ac.jp

Session IV: Lattice Results and Search for QCD critical point / 44

Thermodynamic of Heavy-Light Hadrons

Corresponding Author: htding@quark.phy.bnl.gov

Session IV: Lattice Results and Search for QCD critical point / 45

Beam Energy Scan and the QCD Equation of State

Corresponding Author: phegde@mail.ccnu.edu.cn

Session IV: Lattice Results and Search for QCD critical point / 46

Exploring the QCD Phase Diagram for a Signature of the Critical Point

Corresponding Author: jdeng@sdu.edu.cn

Session IV: Lattice Results and Search for QCD critical point / 47

Search for the QCD Critical Point: Higher Moments of Net-proton Multiplicity Distributions at STAR

Corresponding Author: ccnuxuji@gmail.com

Session IV: Lattice Results and Search for QCD critical point / 48

Generalized Susceptibilities Along the Phase Boundary from the 3-d, 3-State Potts Model

Session IV: Lattice Results and Search for QCD critical point / 49

Inhomogeneous Polyakov Loop Induced by Inhomogeneous Chiral Condensates

Corresponding Author: hayata@riken.jp

Session IV: Lattice Results and Search for QCD critical point / 50

Electromagnetic Field and Anomalous Transport in Heavy-Ion Collisions and Cold Atoms

Corresponding Author: xhuang@th.physik.uni-frankfurt.de

Session IV: Lattice Results and Search for QCD critical point / 51

Thermodynamic Uncertainty Relation and non-Gaussian Statistics

Corresponding Author: tsbiro@rmki.kfki.hu

Session V: Exotics / 52

Exotics from Heavy-Ion Collision

Corresponding Author: suhoung@gmail.com

Session V: Exotics / 53

Recent Activities on Pixel Detector for High-Energy Physics

Corresponding Author: xiangming.sun@cern.ch

Session V: Exotics / 54

Particle Identification at sPHENIX

Corresponding Author: kazuya.nagasy@gmail.com

Session V: Exotics / 55

A Matrix Model for Isospin Matter

Corresponding Author: takuya.kanazawa@riken.jp

Session V: Exotics / 56

Nuclear Symmetry Energy in QCD Degree of Freedom

Corresponding Author: key.s.jeong@gmail.com

Session V: Exotics / 57

End of the Workshop

Session I: Initial Conditions and Chiral Effects / 61

Weibull Model of Multiplicity Distribution in Hadron-Hadron Collisions

Corresponding Author: sadhana.dash@cern.ch

Session III: Collectivity / 62

Study of the Effective Field Theory for Magnons

Corresponding Author: gongyo@ruby.scphys.kyoto-u.ac.jp

Session IV: Lattice Results and Search for QCD critical point / 63

Deconfinement Phase Transition in the Heavy Quark Region

Corresponding Author: pmlo@gsi.de

Session V: Exotics / 64

Effect of Anisotropy on HBT Radii Using Leptonpair Interferometry

Session III: Collectivity / 66

Non-Perturbative Heavy Flavor Transport in Medium

Corresponding Author: mhe@comp.tamu.edu
